THE whole world looks different to you, the first time you take command of this great-powered, superbly poised master of the highways. The landscape seems to glide by more serenely. The road beneath you has suddenly become more luxuriously smooth. You hold your course like an ocean liner on a calm sea. You're exalted, exultant, and magnificently at ease. It takes a long list of engineering achievements, combined only in a Buick, to give you this experience. Little things, like the sixty ball bearings that recirculate through the steering linkage, to give you such effortless control over two-tons-plus of solid automobile. Technical things, like the T-square alignment of the rear wheels by a torque-tube drive.

Important things, like a high-compression Fireball Engine, with an exclusive combustion chamber that gets more power, more distance from fuel. Thoughtful things, like four big soft coil springs—to cushion all four wheels—or seat cushions of double-depth softness. Spectacular things—like Dynaflo Drive, which introduced a whole new concept of smoothness to the transmission of power, now thrilling more than a million owners. Convenient things—such as a turning radius that lets you maneuver this distinguished

dazzler in smaller space than any other car of its over-all length. Here surely is a fine car in name, in style, in appointments, in comfort, in luxury, and performance—at a price that makes it an outstanding buy in its field.
