The People Are Delivered ILLUSTRATED SUNDAY SCHOOL LESSON

Moses and Aaron appeared before the Pharaoh and pleaded that their people might be allowed to leave Egypt. The Pharaoh refused. They performed their miracles before him, but still the Pharaoh denied them.

Then Jehovah brought horrible plagues upon the Egyptians, but still the Pharaoh hardened his heart until the Egyptians' with their families, their flocks and herds.

Olivet Baptist Church | Free Methodist Church

When the Pharaoh realized what it meant to let all these slave workers leave, he sent his army after them. The Israelites, firstborn were slain in one night; then he encamped on the short of the Red Sea, gave in, and the Israelites marched out were terrified, but Jehovah parted the waters and they went safely er.

the facts firsthand!

You-and the SCRAP METAL ERGENCY

ANSWERS every farmer should have to questions about scrap iron and steel

A local inquiry:- If statues are not idols what do you call them?

A. —Three dimensional representations of persons living or dead.

Some are not very flattering. Our cities and parks and public

buildings are embellished with such representations of dead peo-

ple, historically famous. The most historically famous person in

representation of a false god. If Christ is false why be a Christ-

all human history is Jesus Christ. Scripture says an idol is a

Sponsored by ST. JOHN'S LAYMEN'S ASSOCIATION

Do you have a question? Send it to us,

P. O. Box 491, Waynesville.

Q. Why is iron and steel scrop a matter of importance to farmers?

A. Steel for our Country's defense program and civilian economy is being produced at the highest annual rate ever . . . and this will be greatly increased in 1952. Farm machinery and equipment needs must come from this over-all supply. As steel production increases the need for scrap increases.

Q. How does scrap figure in the production of steel?

A. One pound of scrap is needed to make two pounds of steel.

Q. Is scrap getting scarce?

A. Yes, the supply of scrap at the steel mills and foundries is not increasing fast enough to meet the needs of expanding steel production. Yet, there are millions of tons of idle iron and steet scrap, in small amounts, on farms throughout the country.

Q. What if the needed scrap isn't obtained?

A. That will mean a serious loss of steel production... fewer products will be made of steel. It will mean more shortages of civilian products. Defense needs come first.

Q. Why not use pig iron instead of A. Every ion of scrap conserves ap-

Q. What should be done with farm proximately 2 tons of iron ore, I ton of coal, nearly 1/2 ton of limestone and many other vital natural resources-to A. See that every bit of scrap gets to say nothing of transportation facilities.

7. How can more scrap be fur--nished?

maintain production.

Besides, there are not enough blast

furnaces to produce the iron needed to

A. By everybody pitching in-as we always do in every emergency—and searching out all possible sources of scrap. Manufacturers of all kinds of products are conducting scrap drives. Old ships are being salvaged . . . scrap is being obtained from countless sources including farms.

Q. What is farm scrap?

A. It is any worn out, obsolete, unre-

jects made of metal. It may be resting and rusting in fence corners, in the fields, the barnyard or the tool shed.

the scrap dealer located nearest to you. He will break it up into sizes used by the steel mills and foundries. He'll classify the metals then ship the scrap in carload lots. If you do not know the name of your local scrap dealer, consult your local implement dealer for this information.

Q. What else can I do about farm scrap?

A. Support the scrap drive organized in your locality. Work with your local Scrap Mobilization Committee in getting the scrap started back to the steel mills and foundries through the local scrap dealer.
