Putnam Warns Of Socialism, Communism

Samples of subversive propaganda, Bob Putnam, of the industrial and community relations department of the Champion Paper and Fibre Company, addressed the Southern Tile Contractor's convention in Asheville Friday. Putnam spoke of the threat of Socialism-Communism in the United States and this marked his 125th talk on this and related subjects since January 1, 1952. This display is the only one of its kind in the world today. (Photo by Deaton).

Champion Official Warns Of Socialism - Communism

Dwelling on the constant threat of Socialism-Communism in the United States, Bob Putnam of the industrial and community relations department of the Champion Paper and Fibre Company, spoke before delegates attending the annual convention of Southern Tile Contractors at the George Vanderbilt hotel Friday at noon.

This was Putnam's 125th address on this and related subjects since January 1, 1952, and his talk was illustrated and documented.

Using a special display of subversive propaganda pamphlets which are indicative of the millions of such materials which have been flooding the country during the past few decades, the guest speaker explained that this was the only display of its kind in the world today.

The display panel is comprised of photographs of the original unit that was used in the testimony of Walter S. Steele, editor of the National Republican magazine, before the House Un-American Activities Committee, Department of Justice, and a secret security meeting of governors, attorney generals, police chiefs and Army-Navy intelligence officials.

More than 90 of the organizations first exposed by the National Republican, Putnam said, are now included in the Department of Justice's official list of subversive movements.

"With the change in administration," Putnam said, "and a new political party in power our people are too prone to become complacent. The threat of Communism-Socialism to the American way of life was not stopped by the November election.

"The people behind this movement," the speaker continued, "are out to take over the minds, bodies, and even souls of the entire human race, and they intend to succeed even if it means the destruction of our civilization. Basically, the fight is between two completely opposed ideologies—Christianity with its love of God and man and Atheistic-Materialism with no God, and man only existing to serve the state which is his master."

"The real nature of the cold war that is being ruthlessly waged against us," Putnam declared, "is not diplomatic, political or economic. It is moral and spiritual. If we are to survive, we of the Western Democracies must have a bigger idea than Communism and live it with a greater and more revolutionary passion than the Communist lives his ideology."

"Western Democracies' big idea must be 'God shall rule.' In our jobs, in our homes, and in our community life we must prepare to let God rule in us," the speaker declared.

"Our 'Big Idea,'" Putnam concluded, "must be the imprinting of the slogan on our American coins into the hearts of every American — 'In God We Trust!'"

The paper and fibre company executive has received requests for speaking engagements on this subject from many areas of the southeast and more than 23,000 persons already have heard him deliver this message. He has advance speaking engagements in Atlanta, Greenville, Charlotte, Raleigh and many other points.
