

CPL. LLOYD A. BRIDGES

SGT. BOB L. GALLOWAY

The two Marines above have recently returned from active duty in the 1st Marine Division in Korea. Cpl. Bridges is spending a 30-day leave with his parents, Mr. and Mrs. Richmond Bridges, in Waynesville. During his twelve months service in Korea, he was awarded three Purple Hearts, the Korean service medal with two stars and the United Nations ribbon. He is a former student of the Waynesville Township High School where he was a member of the football team.

THE REV. C. V. BROWN, evangelist, will lead Revival Services at East Waynesville Missionary Baptist Church beginning Sunday, September 6. Services will be held at 7:30 each evening, and there will be special singers and music. The Rev. G. H. Shope, Jr., pastor of the church, has also announced Homecoming Services all day Sunday, September 20, with a picnic at noon.

LABOR DAY

(Continued from Page 1)

Hope, for 10 o'clock Saturday morning will honor both the King and Queen of Labor Day and members of their court. Pete Lamplsey, Waynesville, will play for the occasion. The parade will begin at 11 a.m. at the school stadium and the League baseball park. Entertainment will get underway at mid-afternoon at the stadium and continue late afternoon. Walter, chairman of this Labor Day.

For the chairmanship of Clark, the annual pre-Labor Day convention will take place on the platform at the high school stadium Sunday at 3 p.m. Singers will take part in this Sabbath afternoon feature.

MORE ABOUT Rabies

(Continued from Page 1)

Dogs are urged to have them vaccinated at the minimum cost of \$1.00. The price otherwise is \$2.00. The dogs may be taken to the clinic on leash only.

INFORMATION EVERYONE SHOULD KNOW ABOUT RABIES

- 1. Rabies is present in most North Carolina counties.
2. There is no cure for Rabies. It is 100 per cent fatal in both man and animals.
3. Have your dog vaccinated at three months of age and repeat the vaccination every twelve months. This discovery by Pasteur of the vaccination treatment to prevent rabies in humans bitten by rabid animals was one of the greatest medical discoveries of all times. It is essentially the same type of vaccine that is used today to vaccinate our dogs and cats annually against rabies. It is a known fact that vaccination gives adequate protection for at least one year to most animals. Vaccination of animals is not a fraud.
4. The only possible way for a dog or other animal to become rabid is to be bitten by another rabid animal. Healthy dogs do not suddenly go mad.
5. Rabies occurs during every month of the year. It is absolutely untrue that rabies occurs only during "dog days" of late summer.
6. There is a furious and dumb type of rabies in dogs. It is the furious type in which dogs run wild and bite objects in their path. In dumb rabies there is a paralysis and the wild and excitable behavior is absent. All rabid dogs do not run wild, frothing at the mouth.
7. Laboratory tests for rabies are accurate. The techniques used in laboratories in this country con-

LAFF-A-DAY

C. Lee riding devices have been here all week under the sponsorship of the Canton Club for the benefit of the school band. Annual beauty contest for Labor Day program in Canton will be held Saturday in the Canton stadium, starting at 7:30. The program at the stadium will move to Camp for the coronation ball, and the crowning of the queen will be held at the stadium. Pete Lamplsey's Cavalcade will play for the ball. The following were cast members:
Poindester, sponsored by the club.
Jones, sponsored by the club.
Campbell, sponsored by the club.
Crawford, sponsored by the Motor Company.
Smith, sponsored by the Chevrolet Company.
Johnson, sponsored by the County Bank.
Hudson, sponsored by the Department.
Hudson, sponsored by the Department.

"But I just got here! She must have had an early date with somebody else!"

About 700 million pounds less of creamery butter were produced in 1952 than in 1940 in the United States.

A little chopped chutney added to mayonnaise makes a most delicious dressing for lobster or crabmeat salad.

The planet Mercury is about 36 million miles from the sun compared to about 93 million for the earth.

There has never been a buffalo in North America, except in zoos, and the so-called U. S. buffalo is actually a bison.

The primitive peripatus, cross between a worm and an insect, has primitive eyes but usually feels its way with hornlike projections.
