How To Save Cool Weather For Summer

A FAMILY Christmas present of a room air conditioner is not like selling ice cubes to Eskimos, especially if you recall the summer rush and long delays of the last two years.

Close to a million room air conditioners have been sold and installed this year. According to Cloud Wampler, president of the largest single producer of air conditioning equipment (Carrier), 800,000 room units were sold in the first nine months of the year and 75 per cent of them were installed in homes — only 25 per cent in offices, stores and elsewhere.

"Don't be misled into thinking that even the smaller room air conditioners are simply bought and plugged in like electric toasters," advises Wampler. "The truth is the best results are only obtained when you do some careful planning before you buy."

"It's one of those things you first talk over carefully with the family. Next, and just as important, you want to decide how you are going to install it. Thirdly, and this takes an expert, you should check the size needed and electrical requirements. One other point—don't forget to talk the matter over with your landlord, if you have one."

Reputable dealers make estimates on the minimum size room air conditioner needed for the space you select. You never gain

For A Boy's Christmas Start Stamp Collection

A STAMP ALBUM, a starter collection of stamps and a map of the world gives a boy a lifetime hobby of value.

By SYD KRONISH AP Stamp Editor

MANY PARENTS are helping youngsters start stamp collections this Christmas. It makes a most thoughtful gift.

The first thing to do is to buy a large packet of stamps from all countries. The packet should not contain high valued or expensive stamps. To one starting out, the variety and number of stamps is more important than individual values.

Then buy an all-world album. A loose leaf type is probably best. An expensive album is not necessary because the boy or girl will want to buy a bigger and better or different type album at a later date.

Tell the youngster not to paste his stamps but use stamp hinges. A package of hinges costs only a dime.

The new all-world album and inexpensive issues are for youngsters who have no collection and not for those with a fair sized collection and a going hobby.

Be sure the boy or girl is not too young for stamp collecting. The minimum age should be about eight years, depending upon the child's ability to read and comprehend some geography.

If you have a collection of your own, a good suggestion would be to show the collection and tell how you started.

You can make stamp collecting a game for these youngsters, too. Many people start their collections by searching for stamps among old letters or papers.

Friends who work in banks or business houses where letters arrive from far-off countries can help the new collector by adding to the collection.

Stamp collecting is more than a hobby for 19 million Americans.

Returns To Stagecoach

S. WOODSTOCK, Vt. (AP) — Some oldsters make the news with plane flights. Mrs. Fred Perry, 93, reversed the trend. She took a spin in a 150 year old stagecoach here.

She declined an inside seat and skipped spryly up the ladder to view the scenery from the stagecoach top.

Goldenrod Eggs are easy to prepare and small fry love this dish. Cook several eggs until they are hard, then slice the whites in thin slivers and add them to a cup of medium white sauce. Heat and pour over crisp toast; now rub the hard-cooked yolks through a sieve and let them garnish the dish. This amount will be enough for two or three servings.

It is a means of relaxation as well as a factor in broadening one's mind.
