so much magnify goodness, as

It Takes A Lot Of **Hustle To Be Governor**

Only those in public life, or those closely associated with it, can appreciate the time element in such a position.

Take the office of governor, for example. It is a "steady grind" day in and day out, with the public demanding public appearance speeches, and other things which officials are expected to do in addition to carrying on the duties of their office.

Woodrow Price, writing in The Raleigh News and Observer, gave an account of one day in the life of Governor Luther Hodges. Price said the governor needed an elastic day-one with more hours. And, he continued, unless some way is found to stretch time, we're going to have to start electing two Chief Executives. Maybe three. The regulation 24-hour day just isn't enough to contain Governor Hodges.

On this particular day which Price wrote about, the governor was up at 7, after getting in late the night before from Charlotte.

Before 10 he was pulling the whistle cord of a diesel near Fayetteville, as part of a dedication of a new asphalt terminal. He made the dedication address. He left early to get to Dunn, where he picked up Mrs. Hodges and went on to a Baptist gathering in Sampson county 10 miles away. He got there a few minutes before noon, made a 15-minute address, and heard a sermon, then participated in the picnic dinner.

Right after lunch he was whisked away to a nearby school, where he spoke for five minutes to the students. It was 2 o'clock when he left the school.

At 2:30 he was back in Dunn, where a reception was slated for 4 o'clock. The governor took a brief nap, then shaved, put on heavier clothes, and attended the reception. At 5:30 he left for Angier's high school, where he ate supper and made a brief talk before 150 people.

From Angier he headed for Buies Creek and Campbell College. He arrived eight minutes before the evening performance of "The Highland Call", a Paul Green production.

He and Mrs. Hodges obliged the audience with some autographs, and then the governor made a few remarks before the drama began. The governor and Mrs. Hodges enjoyed

the drama, but were cold and tired, so they left at intermission, and arrived back home at 10:20.

Another day for the chief executive. He had been a fireman, made five talks, attended a reception, and saw part of an outdoor drama. He had made one talk to industrialists, one to church folk, one to students, one to a civic group and the last to the drama

All the governor seems to need is a few more hours in each day.

A Timely, And Important Conference

The joint conference held last week between highway officials of North Carolina, Tennessee and the Bureau of Public Roads, was not only timely, but we feel, essential to the furtherance of the highway program in

The three groups sat around the conference table, and in a matter of an hour and a half, were able to discuss the project of a highway linking Western North Carolina and Tennessee.

The conference saved much time, gave everyone an opportunity to participate in the discussion, and certainly arrive at a better understanding of the project. The conference afforded an opportunity for everyone to learn first-hand how the others felt on the subject, and to clear up any point which had been the least bit hazy until that

From all observations, it would appear the Bureau of Public Roads has the fullest confidence in the professional ability and integrity of the engineers and commissioners of

We are gratified that the conference was held, and we think the session will prove to be the means of expediting the pending program many months ahead of what would have been possible without the meeting.

Cold War On South

Another propaganda campaign in the guise of news is coming out of the office of The New York Herald Tribune. The Herald Tribune sent Mr. Homer Bigart, its celebrated war correspondent, on a 6,700-mile tour of the South (including Charleston). The first three of his articles have been sent out by The Herald Tribune Syndicate to other editors who are being invited to buy and print them in their papers.

The articles are written with an obvious slant against Southerners who do not want to accept integration in the schools. It lumps them as "white-supremacists," a favorite smear word.

Mr. Bigart, an able writer and a pleasant person, came South with an already firmly fixed opinion against segregation. (In the North, a Southerner holding a firm opinion in favor of segregation is called "prejudiced.") It wasn't really necessary for him to come South to pick up the opinions written into his series of articles.

Perhaps it is significant that The Herald Tribune picked a war correspondent to report on race tension in the South. The campaign is being conducted on the order of a cold war.—Charleston News and Courier.

Maybe 1955 Will Re Recorded 'Stupendous'

Maybe we just don't have the best memory on earth, but it does seem that we have had more freaks of nature this fall than usual.

The bumper crops of tomatoes, potatoes, have been tremendous, and now we are beginning to have examples of June apples ripening in October, and while one tree was in bloom.

But the fowls of the area are not to be outdone. They too are going into the production of the unusual, as long, slender eggs with two yolks are in evidence.

Of course, the fishermen had a good year, with many extra large ones being caught.

CAPITAL IN USE BY MANUFACTURING CORPORATIONS TOTAL -\$175.0 Billion . December 37, 1954 \$13.5 ed by NAM Research Dept. from Gov't Statistics

It takes a lot of capital to keep America's manufacturing corporations going and growing. In 1954 it took \$175 billion worth, This was the investment necessary for manufacturers to produce goods and keep people employed.

Of this total investment, \$66.4 billion was tied up in land, build ings, tools and machines. Inventories accounted for \$43.3 billion, Receivables—the amount owed by customers on the orders they have received but not yet paid for-came to \$23.8 billion. Cash on hand, or invested in U. S. Government bonds, amounted to \$28 billion, Ready cash is necessary to meet expenses of various kinds-including The two boys, with banjos, pick. payroll and taxes—as they fall due.
