Road Beautification Committee: R. L. Justice, Chairman, M. C. Nix, Carson W. Clark.

Meet The Man But Don't Do It Blatantly

AP Newsfeatures

Even in leap year you can't ask or even imply marriage.

Young men are doing their own choosing these days and a good way to scare them away, they admit, is to look expectant.

One popular man-about-campus thinks the average girl is too confident, aggressive, determined as it is — one reason why he'll not propose any time soon, he says.

"It's the shy-violet type I'm looking for, but where will you ever meet a girl who depends on a man in this day and age?"

There are lots of shy-violet types, the only trouble is that they aren't all in a position to meet young men. They are not the blind-daters, the speak-first in class type, the glad-eye party type. They are taught not to encourage strangers.

But our shy-violet seeker says "not true. There are hundreds of ways a quiet type can meet nice boys."

"How" is the next question and he replies by offering these suggestions. Pretty good ideas, according to girls who've looked over the list. Try one or more in 1956 if you haven't before this and good casting to you.

You can meet him . . .

1. At the library . . . Lots of opportunity there he says. If shelves are high, ask him to reach for that book. Or perhaps you've left your glasses home, a good reason to ask him to help locate a book for you.
2. At the co-op . . . Ask him to help you select something for father, brother or friend.
3. On a committee—Soliciting funds or contributing time to local community chest, school or library projects.
4. School Cafeteria—Waiting on table is a good way to make friends. Or sharing a table over a ham sandwich is another.
5. At sports arena—Ask questions of a stranger if you like—it's accepted. Even the hero's autograph might be sought for a young nephew if it is the hero of the game who captures your imagination.

YUBA CITY FIGHTS FOR LIFE AS LEVEE WEAKENS

CIVIL DEFENSE WORKERS man tractors and bulldozers as every available piece of heavy equipment is put into use to strengthen the levee south of Yuba City, Calif., threatened by the Feather River Raging torrents are bearing down on the mud barriers that protect the city, which is still attempting to dry out from floods that swept the area in December, taking a toll of 33 lives. U. S. Air Force Removes Limit On Enlistments

For the first time in six months, the United States Air Force has opened wide the door to voluntary enlistment in the Air Force. This was announced today by Sgt. Hopkins, local Air Force recruiter for this area.

Sgt. Hopkins stated that the new opportunities for training and service in the Air Force arise through the need to meet the 137-wing goal

to make available in accurate, non-technical form the essential facts upon which population policies must be based.

The bureau also publishes the "Population Bulletin," for use by teachers, students, libraries, publishers, business men and industrial consultants. It supplies information concerning such things as the birth rate among college students; average size families in Great Britain, Germany, France, etc.; population groups over 60; cultivated areas per person for the world; the number of childless couples in the United States; studies on the problem of general function of humanity and the length of generations of fruit flies, whales, rabbits and people.

Cook, who authored the book, "Human Fertility: the Modern Dilemma," lectures on genetics at George Washington University and for 25 years was editor of the Journal of Heredity, founded by the late Dr. Alexander Graham Bell and a group of associates, including Cook's father. When he took over his duties at PRB his daughter, Barbara Cook Lake, became editor of the Journal. His other daughter, Mrs. Peter Sprenger, lives in Springfield, Mass. and a son, John Cook, is athletic coach and math teacher at St. Christopher's School, Richmond, Va.

Bookmobile Schedule

Tuesday, Jan. 24
JONATHAN C. - L. JUNALUSKA

Burgin's Store	9:15- 9:30
R. W. Howell	9:45-10:00
Rock Hill School	10:15-11:00
Mrs. Ethel Boyd	11:15-11:30
Jesse Hannah	11:45-12:00
Orvil Shelton	12:15-12:30
Francis Wyatt	12:45- 1:00
Junaluska Supply	1:15- 1:30

Thursday, Jan. 26
HYDER MT. - CLYDE RD.

W. J. McCrary	9:15- 9:30
Willis Smith	9:40- 9:50
Irene Snyder	10:00-10:15
Annie Long	10:30-10:45
L. E. McGowan	11:00-11:15
Allan Angel	11:30-11:45
Sam Rathbone	12:00-12:20
Patton School	1:00-

Friday, Jan. 27
BALSAM RD. - ALLENS CR.

Allen Hyatt	9:15- 9:30
Barber's Orchard	9:45-10:15
Queen's Store	10:20-10:30
Mrs. Oscar Arrington	10:45-11:00
Kay Allen	11:15-11:30

Makeshift First Aid

DECATUR, ILL. (AP)—Andrew Neureuther, Jr., 14, won the National Boy Scout's Court of Honor Medal.

Nancy Brinkoetter, 6, cut an artery in her arm when she stuck it through a window. Andy applied pressure to the artery until an ambulance arrived. His action was credited with saving her life.

Although Andy's merit badge list includes one each for cooking, swimming, lifesaving and pioneering, he had none in first aid.

Jack Whitner	11:35-11:45
Allens Creek School	11:50-12:15
E. K. Chambers	12:30-12:45
Paul Browning	1:00- 1:15
Ralph Rathbone	1:30- 1:45

Scientists report that the earth is moving into its regular eleven year cycle of sun spots; meaning that there exists unusual eruptions on the sun; and these affect short wave and television signals.

Because this interference "bounces" TV signals back and forth over long distances, you can expect to pick-up ghost pictures and short wave signals and voices from distant states and even from Europe and South America. The low numbered channels will have the most trouble in fringe and near-fringe areas.

We'd like to know at NELSON'S TELEVISION SERVICE the number of times this occurs in this area, and would appreciate a phone call GL 6-6581 or post card about it. Surveys are being made about these occurrences with the possibility that some day they can be used to advantage.

Reference Bureau Gathers Facts On Global Population

By JANE EADS

WASHINGTON—Facts and enthusiasm he had aplenty, only money was scarce, when Robert C. Cook became director in 1951 of the Population Reference Bureau, a nonprofit, scientific organization which gathers, coordinates and distributes important population data all over the world.

That is when his wife, the former Annabelle Desmond, of Dillon, Mont., entered the picture. A student of journalism, experienced in advertising and public relations, equally endowed with enthusiasm, the attractive Annabelle rolled up her sleeves and helped raise fi-

ancial support for the enterprise. By 1952 the Cooks had \$15,000—"The Survival Budget—they call it, which became the springboard that made it possible for the PRB to get a Ford Foundation grant. It received a second grant in 1955 to carry through until 1958.

The PRB, Inc., since its founding in 1929 by the late Guy Irving Burch, has pioneered in its endeavor to awaken public interest in the grave problem of population trends.

It is sponsored by a group of leading biologists, sociologists and economists. Its main objective is

One take-off for traffic -and two for the road

You ought to try Variable Pitch Dynaflo Now!

The light is red and you're ready.

It flashes green and you go—but quick.

And that's when you discover the Number One news about Buick's new Dynaflo . . .

That it gives you brilliant new getaway response for city traffic at only part throttle—even before you switch the pitch of this airplane-principled transmission. (And think of the big gas savings that means!)

Next comes the Number Two discovery—out on the road.

For here—still without switching the pitch—you have plenty more nimble acceleration to surge or spurt ahead, to climb hills, to do with almost effortless ease all the things normally called for by highway driving.

But comes an emergency—the need to get out of a tight spot—and you discover the Number Three news . . .

That you can do what a pilot does. That you can switch the pitch of your Dynaflo blades—just by flooring the pedal. And that you get, instantly, a full-power take-off from cruising pace—an electrifying burst of acceleration—the most thrilling safety measure on four wheels today.

This is performance too good to pass up—and you really ought to try it.

It's performance sparked by the whis-

pered might of big new 322-cubic-inch V8 engines raised to record highs in power and compression.

It's performance that goes with the best ride yet, the best handling yet, the best interiors yet, the best styling yet—and, literally, with the best Buick yet.

Come in and see—and be shown—and learn, in the doing, about prices that make these '56 Buicks the best buy yet.

*New Advanced Variable Pitch Dynaflo is the only Dynaflo Buick builds today. It is standard on Roadmaster, Super and Century—optional at modest extra cost on the Special.
