There have been a lot of new sayings, or truisms about television since it began... like "Vaudeville is dead and television is the box they put it in" and so on. You've heard some of these. But the one that I think is best is "People look at things on television that they wouldn't look out their window to see."

Now this is true... it happens to me all the time and many people have told me the same thing. You catch yourself watching old, corny movies... used car commercials with the same ring... but something happens and you keep your eyes glued to the screen. After it's over you wonder why you wasted the time watching. Maybe a psychologist would have the answer to this situation. I'd like to know.

However, if you have a question about the workings of your television set, we'd like to be of service to you at NELSON'S TELEVISION SERVICE. If we don't have the answer to your problem, we have the affiliation of some leading electronic institutions that can give them to us promptly for your satisfaction.
