At the meeting, Mr. Howell pointed out that civil defense is a problem for all American municipalities who want to be prepared for action in the event of an emergency.

Only by advance planning, he added, can towns and cities be ready to cope with an emergency.

To aid local planning for civil defense, Mr. Howell said, the state CD office will be contacted to ascertain what particular role the Waynesville organization can play in the statewide civil defense system.

Mr. Howell also commented at the meeting that civil defense today is far more extensive than it was during World War II when air raids and alerts were the chief concern of civil defense.

At the next meeting of the advisory council, October 18, Attorney Ray Morgan will discuss the legal basis for civil defense. At the November meeting, Jack Arrington, Health Department sanitarian, will speak on radioactive fallout.

New Cemetery To Be Established Near Canton

Plans have been announced by Ralph M. Crawford for the establishing of a State perpetual care cemetery near Canton. A tract of several acres has been secured, Mr. Crawford said, and machinery is already at work grading and preparing the tract for gravesites.

The site is located on the new four-lane highway about two miles west of Canton, on property formerly owned by the late D. I. L. Smathers of Clyde.

A modern building will be erected on the grounds, which will provide offices, a reception room and living quarters. Hard surfaced streets and walkways will be arranged, and all plots will have uniform markers.

Prevost said about 75 men are employed on construction, and there have been up to 150.

The grading for parking and lumber storage yards is nearing completion.

Prevost said that he expects it will take about 30 days to move equipment from Plant No. 1 to the new plant and get it in operation. He does not expect production to be completely curtailed during this transaction period, as the moves will be scheduled so that production interruption will be held to a minimum.

The new plant is on a 25-acre site not far from the Dayton Rubber plant and has a 600-foot railroad siding built beside the new concrete and steel structure.

A memorial carillon for the late Senator Robert A. Taft of Ohio will be built on the Capitol grounds in Washington, D. C.
