By R. J. BRADDOCK

health service, we wonder if those who are doing this kind of thing, fully realize the risk they are taking.

From a most reliable source we are told that the South is today one of the healthiest parts of the globe. No doubt the older people can remember when epidemics would sweep urban centers and whole country sides, spreading grief and taking a toll in dollars and cents, not counting lives lost which sometimes ran into the hundreds of millions. The public health work has changed that and made the South preeminently healthy region it has become.

Let us preserve the gains for which we are of the utmost importance. Only a fraction of each tax dollar goes for public health. No other money yields greater or more provable returns.

It has been said that we are great only as we find and fill our life. We are not great because we place in the cosmic process called men have pronounced us so, nor are we insignificant because we have never "bust-ed" our way into a Hall of Fame. We are great if we have stood in the secret councils of our own soul and graded "satisfactory" by our own contents.

The great man is the fellow who can come to his dresser at sundown and look at himself with an honest smile, whether he sells gas at a filling station or listens to gas in the United States Senate. If he can drag in from his task, tired in mind and body, but clean within, no register can gauge how much he is worth, no rating system can measure his value.
