WHAT! NO CLINK?

Here's a fine how-d'y-do. Someone gave the monkey a dollar bill, and he doesn't know what it is. Oh, well, the organ-grinder will take it away from him quicker than you can say "genus primate" or even "monkey sees, monkey does," so it doesn't matter. The point is, it only really matters when HUMAN BEINGS don't know how to act when they get more money than they've been accustomed to getting. Salaries in general are much higher than they were a year ago. People are beginning to enjoy the thrill of having a little money left over. Don't make the mistake of not recognizing that money for what it is. It's security. Put it into a savings account today.
