

Don't Blame Your Brother It's The Spirit Of Greed

Foughkeepsie, N. Y., August 24, 1933.
Editor, Duplin Times:
The Albany Packing Company a few months ago sent out circular letter saying: "Don't blame your butcher."
Unfortunately some do blame the butcher for the high price of beef and pork. It is foolish and unjust, to be sure, but we are in the habit of acting foolishly and unjustly. Some blame the President saying that his reduction program is responsible for the scarcity and the scarcity is responsible for the high prices.
Some blame Wilson, Armour, Swift, and other packers, I am not sure that they deserve the blame, if indeed there is any blame anywhere.
A few years ago the coal miners struck for an increase in their pay. They demanded that they be paid ten cents more the ton for digging coal out of the earth. The thrifty operators got busy and threatened to put up the price of coal one dollar on the ton to meet the increased cost of production.
The Spirit of Greed is to blame for many iniquities in our business life. Let us declare war upon this enemy, the Spirit of Greed.
Sincerely yours,
John T. Fitzgerald

Prepare Now For Spring Pastures

Temporary grazing crops, sown this fall, will provide cattle with good economical feed next spring at a time when the permanent pasture is not in condition for grazing.
On many farms over the State, the supply of silage and hay gets low in March, with the result that cows are turned into the permanent pasture around April 1.
At this season the grass is short, watery, and low in nutritional value, said John A. Arey, extension dairy specialist at State College. The sod is also wet from winter rains and is easily cut by the hoofs of cattle.
For this reason, Arey pointed out, cows should be kept off the permanent pasture until it has made a good growth and the sod has become firm. Hence, the need for temporary grazing crops or an adequate supply of silage.
On farms where the soil is mostly clay, he added, the fields are easily damaged by early grazing and silage should be fed the cattle until the sod is firm and the permanent pasture grasses are more mature.
bruzi rye and barley sown at the rate of four bushels to the acre.
For an early grazing crop, Arey said there are several seed mixtures that are good. He recommended a half and half mixture of a-By adding 10 pounds of crimson clover seed to each acre, he continued, the quality of this grazing will be improved a great deal.
Seeding should be done about the middle of September on fertile soil to which 400 pounds of a good fertilizer has been applied to the acre. One acre of pasture will be enough for two cows.

WED ON DEATHBED
Mansfield, Ohio.—Charles Sehead, 47 plumber, realizing that he was on his death bed, was married to Miss Grace Scott. The next day he died leaving his entire estate.

TRAIN FALLS 110 FEET
Hillsboro, Oregon.—Five men were killed when a train plunged 110 feet into a rocky canyon near here when a trestle collapsed.

TEACHEY NEWS
Mrs. D. S. Boney on her seventy first birthday, Friday, August 23 was given a surprise party by her daughter, Mesdames Hubert Boney and V. A. Boney. She spent the morning with Mrs. Hubert Boney and when she returned home in the early afternoon at the door greet-

ings were made by Mrs. Thelma and Mrs. V. H. Boney. On entering the living room, greetings were repeated and she was showered with lovely gifts. Others present were Mesdames P. C. Russell, C. W. Boney, Ross Hill, E. S. Carr, Wallace L. E. Wells, C. W. Wallace, J. C. McMillan and Anna B. Highsmith. After playing games and chatting together, Mrs. Boney and her guests were invited into the dining room where the hostess served a delicious ice cream and birthday cake.

The Womens Auxiliary met at 8:30 o'clock at the Presbyterian church Monday P. M., August 23. Scripture Reading, Acts 10:8-15 by Mrs. J. D. Mallard, Program "Little Journeys Through Synodical and Presbyterial Mission Fields." Mrs. S. R. Turner was leader. Others taking part were, Mesdames Chas. Hearn, J. C. McMillan, Henry Wells, David Wells, C. V. Holland and E. J. Wells. Missions in the mountains, "Does it Pay" by Mrs. J. L. Wells.

Friends of Mrs. R. D. Usher are glad to know she is improving.
Week end guests of Mr. and Mrs. Joe Rivenbark were Miss "Kitty" Mumford, Mrs. Earl Williams and her two children of Wilmington.

Mr. and Mrs. J. G. Merritt, Wilmington spent the week end with Mrs. Merritt's parents, Mr. and Mrs. N. D. Potter.

Sally Margaret Wells entertained a few of her friends at the home of her grandmothers Friday evening, August 23rd.

Mr. and Mrs. James P. Page and children, Misses Sarah Page and

Fertilizing Grain Pays Good Profits

Fertilizer applied to small grains will return a good profit to the farmer when the crop sells for anything like a fair price.
Experiments conducted with wheat at the Piedmont branch station near Statesville have definitely proved the cash value of good fertilizer, said C. B. Williams, head of the State College agronomy department.
Over a period of 11 years it was found that when 200 pounds of good fertilizer were applied to the acre, the increased yield over the non-fertilized fields paid for the fertilizer and gave an average extra profit of \$5.50 per acre.

When 400 pounds were applied, the extra profit was \$14.32 above fertilizer costs. A 500-pound application produced a gain of \$15.42, and an 800-pound application gave a profit of \$17.86 an acre above the cost of the fertilizer.

The exact amount of the gain to be derived from fertilization depends, of course, upon the individual farmer's soil, weather conditions, cost of production, and price of grain on the market. Professor Williams pointed out.

On average Cecil clay or clay loam soils of the Piedmont area, he recommended a fertilizer mixture containing 10 percent available phosphoric acid, 4 per cent nitrogen, and 4 percent potash. From 300 to 400 pounds per acre should be applied when the crops are young.

Where the soil is good, or where it has been fertilized with manure, or where legumes have been plowed under, the percentage of nitrogen in the mixture may be reduced or even left out. Piedmont soils in average condition need at least 4 percent nitrogen, he added.

Cattle For Exhibit Need Good Fitting

Cattle to be exhibited at fairs should be given special care and feed for a month, or more, before they are to be shown.

The amount of grain to feed depends upon the condition of the individual animal at the start of the fitting period. The animals should enter the show ring with enough flesh to appear thrifty, but with no surplus fat.

As a feed, John Arey, extension dairy specialist at State College, recommends a mixture composed of 30 pounds of corn meal, 30 lbs. of crushed oats, 25 pounds of wheat bran, and 15 pounds of linseed or soybean meal.

If at the beginning of the fitting period the cattle lack flesh, he stated, it is well to give them a small amount of commercial molasses feed with the grain mixture.

During the show period mixed hay is preferable to legume hays, since the latter often induce scours if the cattle are moved from one fair to another.

Since silage is not available at the fairs, beet pulp may be substituted in the ration. Arey suggested that the animals should be changed to the beet pulp feed a short while before show time.

During the fitting period, teach the animals to lead and pose well, he urged, as many good animals have been placed down the line because the attendant was unable to handle them properly.

Blankets placed over the animals during the fitting period will help give their coat a sleek, glossy appearance. The blankets should be removed daily and each animal given a good rub down with brush and hand. Clip the head, ears, neck, belly, and tail setting a few days before exhibition time. Trim and polish the horns and hoofs.

SARECTA NEWS

(Intended for last week)
We sure have had some rain in Sarecta for the last few days.

Mr. Prentice Garris spent Sunday evening with his parents, Mr. and Mrs. C. R. Garris near Le-Grange.

Mr. Paul Englam spent Sunday afternoon with Miss Thelmer Capps in Beaton.

Mr. Junior Fulton spent last week with his grand parents in Beaton.

Mrs. John Smith spent last week with her mother, Mrs. A. A. Quinn of Kenansville.

Mrs. John Smith spent Sunday evening with Mr. and Mrs. Joe Beaton in Sarecta.

Mr. and Mrs. E. A. Daughtry's brother and family spent the week end with them.

Mr. and Mrs. Rosa Fyter spent the week end with their parents.

Mr. Ben Daughtry is some better from his spell of his long illness. Mr. and Mrs. Arthur Whitfield, Mesdames Grace Holland and Hazel

with spent Sunday at Williams.

Mr. and Mrs. Chester A. Smith, Statesville were week end guests of Mr. and Mrs. E. G. Forlow and Mr. and Mrs. David Wells.

Sally Margaret Wells left Sunday night for Greensboro to spend a week with her parents, Mr. and Mrs. R. W. Wells, then she will return to New York to enter school.

Mr. Don Smith, Jr. and Mrs. Hester Wallace spent several days last week at Carolina Beach.

Mr. Paul Ingram visited Miss Thelma Capps of near Kinston Sunday afternoon.

Messrs. Prentice Garris and Forrest Martin visited near Kinston Sunday.

Mr. Troy Holland gave a small number of his friends a fish-fry Thursday night. Everyone reported a nice time.

Among the friends and relatives that visited Miss Ruby Martin Sunday were as follows: Misses Inez Wagstaff and Linnie Grant, Messrs. Bruce Jones, Chester Wagstaff, Strick Roberson and Paul Wagstaff, all of Clinton.

Misses Ruby Martin and Linnie Grant, Messrs. Paul Wagstaff and Strick Roberson, visited Miss Grant's friends and relatives at Jacksonville Sunday afternoon.

Welding
... the best way to make a perfect union of two pieces of metal is by welding them together.

... and the best way to get a more pleasing flavor and a better taste in a cigarette is by welding together the different types of tobacco ...

That is just what we do in making CHESTERFIELD Cigarettes—the three types of mild ripe home-grown tobaccos, that is tobaccos grown in this country, are welded together. Then they are welded with aromatic Turkish. When these tobaccos are welded

together you get a combined flavor which is entirely different from any one type of tobacco. It is this welding of the right amounts of the right kind of tobaccos that makes CHESTERFIELD a milder and better-tasting cigarette.

Chesterfield ... the cigarette that's MILDER.
Chesterfield ... the cigarette that TASTES BETTER.

READY.
For the Biggest Fall Season in the
32 Years We Have Served as
"Kinston's Leading Clothier"

Mr. H. Stadiem has just returned from the Eastern Markets where he purchased NEW FALL CLOTHING, SHOES and FURNISHINGS. We are ready to serve the people of Kinston and those who come to Kinston to buy and sell.

If you buy at STADIEM'S higher price for tobacco does not mean higher prices for clothing.
