

With Radio Fans

The Carol Caravan—1935 Fall season—seems likely to prove the season's outstanding success in radio, according to newspaper and magazine critics with their fingers on the pulse of the radio public.

Not high in quantity of fan mail, resulting from a single show followed the debut of smoothly operating combination of talent October 1st on the WABO-Columbia network. Walter O'Keefe and Glen Gray and the Casa Loma Orchestra are old-time Caravan favorites, counted on to hold all the vast Caravan audience of other seasons.

Ted Husing, Columbia's ace sports commentator, is also back with the Caravan, with his reviews and predictions on all big sports events.

Deane Janis, warm-voiced contralto singing her first big opportunity on the show, provides a new note to the show. Miss Janis was

chosen as the feminine model at the audition which eliminated 57 competitors.

The Caravan program is on the air at 9 P. M., E. S. T., every Tuesday and Thursday evening.

LYMAN NEWS

Mr. Tom Rayner is seriously sick at his home near here.

Miss Maggie Padrick spent the week end with Miss Lillian Lanier. Mr. Albert Wood from Bryson City visited his sister, Mrs. Grover Mearns Monday.

Mrs. Billie Whaley spent Saturday with her parents, Mr. and Mrs. M. Hunter.

Mr. and Mrs. Clayton Nethercutt spent Saturday in Wallace. Miss Beatrice Mobley spent Friday in Rose Hill.

Mrs. Hugh Hunter spent Sunday with her mother, Mrs. D. M. Lanier.

Mrs. L. N. Lanier spent Saturday with friends at Deep Bottom.

Mrs. H. M. Lanier and Mrs. Jack Lanier spent Saturday in Kinston shopping.

Miss Pauline Williams and Mr. Jonas Heath were married in S. Carolina Sunday. They will make their home with Mr. Heath's father, Mr. Henry Heath.

Bethel Presbyterian Sunday School had a Rally Day Program last Sunday. The offering for this Sunday was sent to Edward D. Grant, Richmond, Va., for the purpose of helping organize new Sunday Schools, Training leaders and establishing vacation church schools.

Potters Hill News

Messrs Don Quinn, Burris Hall and Cheslie Thigpen and Misses Veora Thigpen, Estelle Thigpen and Ruth Edwards attended the show at Beulaville Saturday evening.

Miss Essie Mae Turner was the guest of Miss Ronnie Quinn Sunday. Mr. and Mrs. Billie Turner of Beulaville were the guest of Mrs. C. L. Quinn Sunday.

Messrs Inez, Vendetta and Verdie Quinn were the guest of Mrs. Ella Turner Saturday night.

Rev. George Turner is holding a tent meeting at Dogwood Flats

on the farm of E. J. Quinn, at the tobacco barn. Everyone is invited to attend.

Mr. L. H. Quinn went to Burgaw on business Monday.

Teachey News

Mrs. Chas. Hearn returned home last week after spending sometime with her husband at Aberdeen. Mr. Herman, accompanied her.

Mrs. Maggie McMillan and John McWells returned home last week from Greensboro where they had been visiting Mr. and Mrs. Geo. F. McMillan and Mr. and Mrs. R. W. Wells.

Mr. and Mrs. T. R. McMillan of Fayetteville were guests of Mr. and Mrs. E. L. Turner last week. Friends of Mrs. Edgar J. Wells are glad to know she is able to be out again after undergoing an operation recently at James Walker Memorial hospital, Wilmington.

Mr. and Mrs. Carl B. Cooper and daughter, Carolyn, of Montgomery Ala., and Mr. James Cooper, Kerr were guests of Mrs. S. M. Justice last week.

Mrs. Jim Ramsey and infant daughter, Ruby Ann returned to their home in Burgaw Friday after spending a week with Mrs. R. D. Usher.

Mary Elizabeth Turner has returned home after a stay of eleven days at Duke Hospital, Durham where she underwent an appendix operation. Her mother, Mrs. S. R. Turner spent some time in Durham while she was in the hospital.

Rev. S. G. Harness, assisted by Dr. E. S. Gillespie, Greensboro conducted a series of evangelistic services at the Presbyterian church last week. The meeting was enjoyed by all that attended.

Messrs J. B. Wells and S. R. Turner went to Durham last Sunday.

After spending the summer in Warsaw, Mr. and Mrs. R. P. Usher have returned to Teachey.

Sweet Potatoes Are Still Free

GUY A. CARDWELL
Agricultural & Industrial Agent
Atlantic Coast Line Railroad Co.

There is no over production of sweet potatoes suitable for the commercial market, hence this crop may be disposed of without formality or restriction as long as the sweet potatoes are good to look at and of a good flavor.

Growers in Northeastern North Carolina counties and growers on the Eastern Shore of Virginia, Maryland, Delaware and New Jersey are now sending sweet potatoes of the Jersey types to market in volume and at the time this article is being written (September 11th) the demand is fair and the prices on the New York market range from 75 cents to \$1.90 per bushel basket.

North and South Carolina growers of Uorto Ricans who made market shipments during the past winter and spring from the crop of 1934 fared very well and shipments were well in excess of the year before. The demand was strong and remained so until the entire commercial crop was cleaned out.

I am showing below some of the things to be done to improve the growers chance of getting top prices for his potatoes.

Sweet potatoes should be harvested when mature and before the vines are killed by frost. If the vines are killed by frost they should be cut from the stems immediately and the potatoes harvested as soon as possible.

Potatoes should be harvested in such a way as to prevent bruising which renders them subject to rot and lowers the market quality. The implement used to dig sweet potatoes should be one that does not cut or bruise the roots. One of the best types of diggers is a plow with rolling colters on the beam to cut the vines and with rods attached to the moldboard to free the roots from the soil and vines. A middle buster is also a good implement for digging sweet potatoes. After the roots are dug they should be scratched out by hand and allowed to remain exposed long enough to dry. They should never be thrown from one row to another, thrown loose into a wagon body or put into bags. The digging should be done, if possible, when the weather is bright and the soil dry.

Grading should be done in the field at harvest time. A good plan is to go over the rows and pick up the sound, marketable roots in one basket, then gather all the seed stock in another basket or box and put the injured ones in a third basket. These boxes or baskets should be loaded on a wagon with springs and hauled direct to the storage house. If the roots are to be stored in baskets, boxes, or crates, the different grades should be put by themselves, and when stored in bulk they should be placed in separate bins.

The storage house is the most efficient means for storing sweet potatoes. However, many farmers successfully use tobacco barns in which to cure and store sweet potatoes. Potatoes from Black Rot infected soils should not be stored. All diseased potatoes should be destroyed at harvest time and not placed in storage. Before sweet potatoes are placed in the house, it should be cleared of all decayed sweet potatoes or other debris and swept clean. Then it should be disinfected by one of several methods, any one of which will be satisfactory if properly carried out. It is essential that the cleaning and disinfection be done thoroughly if they are to be effective in helping to control storage losses. Among the several methods of disinfection are the following: Spray the entire interior of the house with a solution of copper

sulphate (bluestone) made in the proportions of 2 pounds of copper sulphate to 50 gallons of water. All bins or other containers previously used should be treated also.

Apply, thoroughly, a coat of ordinary whitewash to the entire interior.

The most effective method is to fumigate the house with formaldehyde gas. Formaldehyde is an irritating and poisonous substance, and must not be breathed nor allowed to get into the eyes. It is thus necessary to get out of the house quickly after the gas is released. Where formaldehyde is to be used, the following directions should be noted.

Each 1,000 cubic feet of space to be fumigated requires 3 pints of commercial formalin (a 40 percent solution of formaldehyde in water) and 23 ounces of potassium permanganate. The potassium permanganate should be placed in a deep container such as a 3 or 2 gallon stone jar and the required amount of formalin poured upon it. A sufficiently large container for the formalin should be used, so that the required amount can be poured into a jar without the necessity of measuring successive portions. Speed in handling is essential for safety. If a large house is to be fumigated, several receptacles should be used, distributing them uniformly over the house. If several are used the required amount of permanganate should be measured into each beforehand and the jars properly distributed over the house. All doors and windows should be tightly closed except one convenient door. The formalin should be first poured into the container farthest from the door, and the operator should work rapidly toward it, getting out of the house promptly. The house should be kept tightly closed for at least 24 hours.

Farms in Rockingham County on which no lespedeza was grown four years ago now have from 5 to 25 acres each.

Eleven Alamance County farmers will start new crop rotations following a recent visit to that county by Enes Blair, extension agronomist at State College.

About \$45,000 was distributed in rental checks to tobacco farmers of Nash County by the farm agent last week.

HOW OLD IS YOUR REFRIGERATOR?

If your refrigerator is five years old you can put a new General Electric in your kitchen now and be money ahead. Operating savings will pay for it.

The first G-E Monitor Top—with its sealed-in-steel mechanism revolutionized refrigeration costs. Now the efficiency of this matchless mechanism has been amazingly increased. Today's General Electric Refrigerators have double the cold producing capacity of 1930 models and use 40% less electric current.

NEW CONVENIENCE FEATURES. With a new G-E Refrigerator you will not only save 40% in operating cost, but you will have the advantages of all new convenience features. Automatic Interior Lighting. Sliding Shelves. Foot Pedal Door Opener. Stainless Steel Super Freezer. Temperature Control for fast freezing and defrosting switch.

BALANCE YOUR WINTER BUDGET with the thrifty savings a new General Electric Refrigerator will bring you. Remember fall and winter food prices will be higher and you will need dependable refrigeration more than ever.

Reddy Kilowatt Your Electric Servant **Says:**
"Whatever you do, be sure the electric refrigerator you buy is large enough for your needs. The General Electric is a constant joy, because it never needs attention—not even oiling. For that reason you should have a refrigerator large enough to hold all the week-end savings that you will want to take advantage of, and all the left-overs you may need to save. My services are available for as little as 5c for 24 hours work."
