undisputed advantages of the, V-type engine ... simplicity, economy, compact-" ness, ruggedness. But until Ford announced the first Ford V-8 in 1932, no one had found a way to bring these advantages to the low-priced field.

> SINCE its introduction this en-fined and improved—but the basic features of Ford design have re-mained unchanged through the roduction of over two million V-8 engines.

This is the engine that powers the beautiful 1936 Ford V-8... This is the 8-cylinder engine which, because it is V-type and

room" that many a woman has wondered about in the Ford V-8 body.

This is the engine which proved sparkling performance and eight cylinder smoothness are economical if you have a V-type engine with a dual-downdraft carburetor that takes the "gas" used by a four and splits it into eight equal charges.

This is the engine you need for quick, sure, cold-weather starting this winter-the engine that's "opened the eyes" of over two million enthusiastic Ford owners. You'll find such an engine in

no other car at anywhere near the price of the Ford V-8 for 1936-So why not arrange to drive one today?
