Our Christmas

The boys and girls come from college and reunite the family circle and that would be approved by Jesus. Sons and daughters away from home following some business or profession come home for the day, and that would meet His approval. Special services at the Churches would please the Master whose birthday we are trying to celebrate.

But did you ever stop to think how it must grieve the Christ Child Jesus, when we give large gifts to others and forget to give a gift to Him? When we break the blessedness of silence with thundering fireworks; when we allow whiskey, wine or beer to enter our bodies which He has declared to be the home of the Holy Spirit; when we take the Christmas season as an occasion to let the bars down and live lives of ease; when we become so interested in pleasure and things that we forget altogether that this is His Birthday? Yes do we stop long enough to think what Christmas means?

Christmas Day is the celebration of the Birth of Jesus. Then lets spend it in a way that will glorify Him.

Wardens to serve under the district warden.

Now in case a fire breaks out, what equipment does the district warden have. In selecting these men, the county warden tried to choose men who had good common sense so as to know how to act under an emergency. Each district warden has a hand pump which has a capacity of five gallons, and which sends out water in a spray or small stream as the fire may require. Buckets are furnished so that helpers can keep the tank on the pump full of water at all times. This is a very efficient fire fighting implement. Each warden will also have two fire fighters called the "Swatter". This instrument is made from mill beeting 12 by 18 inches, fixed on the end of a handle and is used to beat out the fire. Each warden has about three of these and those who have had the opportunity to use them say that they work fine.

Your county Forest Warden asks that you be very careful about setting out fire on your farm, and before you do set out said fire be sure and notify all adjoining landowners that you are planning to do some burning so that they can be on the lookout.

"It is the duty of every citizen who sees a fire burning in any field or woods, to report the fire at once to the nearest warden, and offer to assist him in any way possible with the fire. We hope that all citizens will cooperate with the department and make prompt reports on all fires. More next week. Material furnished by Ralph Miller, County Forestry Warden.

Trucks-More-Trucks

Have you been to Wilmington lately? You ought to go and see what the heavy trucks have done to Highway 40. At present it is unsafe for travel in many places, the surface having been broken through by heavy loaded trucks. How can we tell what is tearing up the roads? You will notice that the breaks are on the right-hand side of the highway coming from Wilmington, and that is the side the trucks out of Wilmington, loaded with fertilizer and oil drive on. The left hand side on which the trucks return to Wilmington is in much better shape but with the cotton season on us we can expect other damage to the roads from these heavy trucks.

What can we do about it? Lets be careful for these trucks are very dangerous as they speed along the road at full speed. Then lets see if we can't put to heavy hauling back on the biggest taxpayers in the county, the Railroads. They have made the country what it is today, lets give them the break.
