

KENANSVILLE HAPPENINGS

Miss Kate Newton spent last week end with Mrs. T. C. Moore in Kinston.

Miss Nancy Juessely spent the week end with Miss Josephine Mercer at Entfield.

Mrs. J. E. Jerritt spent Monday in Raleigh shopping with her daughter Caroline, who attends Peace College.

Miss Anna Kate Craig spent the past week end with her parents in Marion.

Mrs. Wilber Adams of Angier visited her parents here during the week end.

Mrs. Alton Newton and baby-girl, Sally, spent several days last week in Kinston.

Mr. and Mrs. William Mercer and baby of Bladenboro spent Sunday here with Mr. and Mrs. Sam Newton. They were accompanied home by Mrs. Newton who will visit them several days.

Superintendent and Mrs. O. P. Johnson went to Raleigh one day last week.

Rev. and Mrs. A. D. Outlaw and children of Elizabeth City spent the week end here with the Albert Outlaws.

Mrs. I. F. Ormond of Goldsboro is visiting her daughter, Mrs. G. R. Dail.

Mr. Murphy Canady left Tuesday, for Louisville, Kentucky to help as a social service worker in the flood area.

Mr. and Mrs. W. E. Powell and son spent one day recently in Durham.

SEWING CLUB

Mrs. Faison McGowen was hostess to the B. M. G. Sewing Club on last Tuesday afternoon from 3 to 5 o'clock. A goodly number of members also one visitor were present regardless of the stormy weather. After the usual sewing bee the guests were invited into the dining room where they were seated at an attractively appointed table for refreshments. The Valentine motive was carried out most effectively. Mrs. E. V. Wells was given the seat of honor since it was also the occasion of her birthday. She was presented a lovely salad bowl by the hostess.

CIRCLES MEET

Circle No. 1 of the Woman's Auxiliary of Grove Presbyterian Church met on Monday afternoon at 3:30 o'clock with Mrs. Walter Stroud. There were ten ladies present. The Bible Study in Genesis was lead by Mrs. F. L. Goodman. After an interesting business session, the hostess, assisted by Miss Inez Stroud, served chicken salad with accessories.

Circle No. 2 met on Monday night at 7:30 o'clock with Mrs. J. B. Wallace. The Bible Study was in charge of Miss Nancy Juessely. Six members were present. Prior to adjournment, the hostess served a salad course.

KONTRACT KLUB

The Kenansville Kontract Klub met on last Thursday afternoon at 2:30 with Mrs. Oliver Stokes. The meeting was marked by one hundred per cent attendance which was the first time in several months. It was the first time that Mrs. J. M. Brook had been able to attend the club since November and most fitting that she should walk away with the high score prize which was a double deck of cards. Mrs. D. S. Williamson was given a handkerchief for consolation. A tempting salad course followed the games. Valentine talies were used and red valentine baskets filled with mints were given as favors.

P. T. A.

In the absence of the president, Mrs. Lawrence Southerland presided over the P.T.A. meeting last Thursday night. This was the regular February meeting at which time a fairly large crowd gathered together to observe "Foun-

der's Day." The program was in charge of Mrs. G. V. Gooding, who presented a pageant picturing P. T. A. work for the past forty years, as the characters gathered around a large birthday cake bearing miniature candles. Those taking part were: Janet Dobson, Mrs. F. W. McGowen, Miss Anna Kate Craig, Miss Margaret McGowen, Miss Mildred Fate and Mrs. F. L. Southerland. After the business session a social hour was enjoyed in the school lunch room.

J. F. Criswell Gives Crop Classifications

Classifications of soil-conserving and soil-depleting crops for the 1937 soil-conservation program in North Carolina have been announced by J. F. Criswell, of State College.

Crops to be counted as depleting are:

Corn, cotton, tobacco, peanuts harvested for nuts, broom corn, sorghum when harvested, and truck and vegetable crops, including melons, strawberries, and Irish and sweet potatoes.

Wheat, oats, barley, rye, buckwheat, and grain mixtures when cut for grain or hay. Sudan, millet, and Italian rye grass harvested for hay or seed.

Bulbs and flowers.

The following crops which help build up or improve the soil are to be counted as soil-conserving:

Sweet, red, alsike, white, and mammoth clovers. Alfalfa, kudzu, and sericea. Soybeans, velvet beans, field peas, and cowpeas. Vetch, Austrian winter peas, bur and crimson clover, crotalaria, and annual varieties of lespedeza.

Peanuts when pastured. Sudan, millet, and Italian rye grass not harvested for hay or seed. Bluegrass, Dallis, redtop, timothy, orchard grass, Bermuda, carpet grass, and mixtures of these.

Rye, oats, barley, wheat, buckwheat, and grain mixtures not cut for grain or hay, provided a good growth is left on the land.

Forest land planted on crop land since January 1, 1934, and sweet sorghum that is not harvested.

NEW PROVISIONS

When land is used to grow both depleting and conserving crops, the entire acreage will be counted once as soil-depleting, and a part or all of the same acreage will also be counted as soil-conserving.

When summer legumes are grown in combination with depleting row crops, the entire acreage will be counted once as soil-depleting, and half of the same acreage will also be counted as soil-conserving, provided the legumes occupy at least one-half the land and a good growth has been attained.

This means, Criswell explained, that in figuring the general soil-depleting base for a farm, the entire acreage of these mixed crops will be counted in. And in determining the soil-conserving acreage, one half of the same "mixed acres" will be counted.

The entire acreage on which mixtures of legumes and depleting crops (winter legumes and small grains, or summer legumes and annual grasses) are harvested together shall be classified as soil-depleting. One-half of the same land will be counted in the soil-conserving acreage if at least 20 per cent of the total growth harvested consists of legumes.

When a depleting crop is harvested and immediately followed

by another legume or perennial grass the same year, the full acreage will be soil-depleting. One half of the same acreage will also be counted as soil-conserving. If the legume is an annual winter variety, the entire acreage will be counted conserving as well as depleting.

When specified crops are plowed under as green manure after at least two months' normal growth on land from which a commercial vegetable is harvested the same year, the entire acreage will be counted as soil-depleting and as soil-conserving.

Land not used for producing either depleting or conserving crops, and devoted to the following purposes, is classified as neutral.

Vineyards, tree fruits, small fruits, bush fruits, nut trees, and nursery stock not interplanted.

Any portion of such land as is interplanted will be counted as the actual acreage of such crop planted.

Idle crop land, cultivated land lying fallow, waste land, roads, lanes, lots, yards, and other similar non-crop land, and woodland not planted to forest trees since January 1, 1934.

FORESTRY NOTES

Last year our road signs said "Help Prevent Forest Fires", but this year our forestry group has more faith in us and the road signs are reading "Prevent Forest Fires." We can make this our ideal, and by cooperation with our forestry department can keep fires out of our timberland. Let's make the motto a reality this season.

When you are shopping be sure to mention The Duplin Times.
