...AND OF COURSE WE IMPROVED AMOCO-GAS, TOO!

An improved and enlarged refinery . . . new equipment . . . new processes . . . we've announced all this in the past few weeks. We've told how these improvements enable us to build-in greater value in American Oil Company products. But we've saved the best part of the story till last — the story of the new Amoco-Gas. It's an important story. And here it is:

AMOCO-GAS has always been the world's finest motor fuel—the *very* finest. But recently from the workshop of Science came word of a new and history-making triumph. Science had won another great victory in its struggle to wrest even bigger values from crude oil. New, revolutionary, radically different refining processes had been invented. At a cost of many millions, American Oil Company designed and installed new equipment . . . incorporated these new patented processes into what was already the world's greatest and most modern refining unit.

And as a result, the new Amoco-Gas is better than ever before. In smoothness, performance, economy — in *everything*—it's better. It's the greatest Amoco-Gas in our history! And that's saying a lot — because Amoco's history has been a glorious one. Amoco-Gas revolutionized the automotive and gasoline industries when it was first introduced . . . made possible the modern high compression motor. And now it makes history again.

See for yourself that the new Amoco surpasses anything you've ever used! Fill your tank with the new Amoco-Gas. Then get out on the open highway. It will be an experience such as you've never had before! And the new Amoco-Gas actually costs less in the long run . . . it costs a little more per gallon, but *much less* per mile! The new Amoco-Gas is the greatest in our history. Always the best—now better than ever! Try it today! AMERICAN OIL COMPANY

By RAYMOND PITCAIRN

That "the Legislature may propose amendments to the Constitution, which shall be binding when assented to by three-fourths of the States."

That "an address to the States accompany the Constitution, when transmitted for ratification."

"Much of the discussion centered on the powers of, and restraints upon, the President and Vice-President. It was decided to give the Chief Executive the power, in concurrence with the Senate, to appoint officers of the United States, ... "whose appointments are not otherwise provided for" in the Constitution.

On the proposal that the Vice-President sit as President of the Senate, ... George Mason, of Virginia, protested that the office would be an encroachment on the rights of the Senate, and that it would ... the Legislative and the Executive, which, as well as the Judiciary department, ought to be kept as distinct as possible."

Elbridge Gerry, of Massachusetts, offered further objection to the plan that the Vice-President might give the Chief Executive too much power.

"By might as well," he said, "let the President himself sit as the head of the Legislature. The close connection that must subsist between the President and Vice-President makes it absolutely improper."

To this Governeur Morris made a prompt and witty response.

"The Vice-President," he said, "then will be the first man in the United States next to the President, and will be the first object of impeachment, whenever any person shall have an interest in obtaining the removal of the President."

With these points Federal Convention adjourned for a week and the Revised Committee of Style reported on Sept. 12.
