STATE OF NORTH CAROLINA
Insurance Department

Raleigh, June 2, 1942

I, DAN C. BONEY, Insurance Commissioner, do hereby certify that the above is a true and correct abstract of the statement of the Security Life and Trust Life Insurance Company, of Winston-Salem, N. C., filed with this Department, showing the condition of said Company on the 31st day of December, 1941.

Witness my hand and official seal the day and date above written.
DAN C. BONEY, Insurance Commissioner.

4-H Members Carry War-Time Projects

Congratulations to the 100,000 members of 4-H Clubs in North Carolina as extended by L. R. Harrell, State 4-H Club leader of the N. C. State College Extension Service, in connection with the State and National 4-H Achievement Weeks. The State celebration is being held this week, November 1-7, and the National observance of 4-H Achievement Week is scheduled for November 7-14.

Harrell and Miss Frances MacGregor, assistant State Club leader, made a sample survey of 4-H activities in 30 counties, and they found evidence that approximately \$267,419 worth of War Savings Bonds and Stamps have been purchased, and \$194,317 worth sold, by the 4-H clubs of the State.

The 100,000 club members have collected approximately 6 1-2 million pounds of scrap metal, more than one million pounds of scrap paper and rags, and 858,632 pounds of scrap rubber through their cooperation in the Salvage-for-Victory program.

About 10,594 members increased the farm family's fuel supply through 4-H forestry projects, 8,066 members participated in fire prevention work, and 15,723 enlisted in the campaign to repair and care of farm machinery.

A total of 14,199 members took first aid courses, 1,788 farm boys and girls are acting as air raid wardens, and 29,098 are cooperating with local defense agencies in other activities.

Harrell says that practically every 4-H boy and girl, including the 40,000 new members enrolled through the 4-H Mobilization for Victory campaign last summer, has conducted a food production project, such as growing a vegetable garden, corn, peanuts and soybeans or raising poultry, swine, dairy calves, and baby beeves.

Farmers are Urged To Seed Legume Crops

North Carolina farmers should take advantage of the additional time allowed for seeding winter legume crops and spreading lime and phosphate under the 1942 AAA program, according to E. Y. Floyd state AAA executive assistant at State College.

The time limit for carrying out these soil-building practices, he said, has been extended through November 15 because of delays caused by recent heavy rainfall. Other phases of the 1942 program in North Carolina closed on October 31.

"Our recent unseasonable rains came at a time when many farmers had their legume seed and lime and phosphate ready for use, but had been delayed in using them by the necessity of harvesting crops already matured. Appeals from farmers and AAA leaders throughout the state resulted in an extension of fifteen days for carrying out these practices being granted by AAA officials at Washington," Floyd said. "This will make it possible for a large number of farmers to complete farming plans they mapped out several months ago and earn their maximum soil-building payments under the 1942 program."

Payments made by the AAA for seeding legume crops and spreading lime and phosphate are counted toward the maximum soil-building practice payments which may

be earned by any individual farm cooperating in the Agricultural Conservation Program.

Floyd declared that seeding of winter legumes and spreading lime and phosphate are more important than ever before this year due to the shortage of nitrogen fertilizers and the need for more pastures in the Food for Freedom Program.

"Nitrogen will be harder to obtain next year than it was last spring, and we will have to provide as much as we can for our own use by storing it in the soil with legume crops," he said.

State College Hints For Farm Homemakers

Today's storage is tomorrow's dinner. Don't store glass jars of fruit and vegetables (1) in hot places, (2) in damp places, (3) in bright places (4) on weak shelves.

Fresh fruits and vegetables should be stored in a way that will preserve their attractive colors, their fresh flavors and their health-giving nutrients.

The most useful cellar will be large enough to hold canned goods as well as potatoes, turnips, beets, carrots; cabbage, celery, onions, and apples. Cellar, cave, and pit storage are cheap and effective for many vegetables. In storage cellars or caves, shelves, bins, or stacked crates may be used to conserve space and provide for free circulation of air around fruits and vegetables.

What foods build strong muscles? Milk, eggs, meat, cheese, dried beans and peas. These foods not only build muscles but help keep muscles in good repair.

Do milk, eggs, meat, dried beans and peas have any other value in the diet? Yes, they help safeguard the health of the body. They are some of the "protective" foods rich in minerals and vitamins.

How does milk rank as a building food? How does it rank as a "productive" food? Milk, besides being a muscle building food, is also the best single food for building strong bones and teeth because it is the richest source of calcium. Whole milk, cream and butter and rich in thiamin so necessary for protecting our body against infections and for keeping our eyesight clear and keen.
