CONTINUED FROM FRONT come critical. The Branch (B. F. Grady Col) high school is opered in Book 385 page 85 of Duplin ating with seven teachers in a negro tenant house. Exactly 250 children are crowded into space built to accomodate an average family. All negro auditoriums except Magnolia and Wallace have been divided into class rooms. All of our negro schools are overcrowded beyond capacity; using halls, stages and all available space for class room purposes. We the Bear Head Road in C. H. do not have a science room nor li-Carter's line; thence his line South | brary room in any of our negro schools

Toilet facilities are adequate in only two of our schools, These have recently been re-modeled and this important factor has not been over looked.

Seating for the children of the county is as critical as housing. We do not have enough seats to furnish a seat for each child. Likewise, science and instructional equipment and apparatus is almost line and runs thence his line South non-existant in all of our schools.

At hold a joint meeting on Monday, best the sewage runs through a septic tank and thence to a ditch or creek too near the school. This is a health menace not only to the excepting a cart path as provided children but to the entire community. All negro schools have outdoor privies.

We have the best fleet of busses in the State for the transportation of our children, but it is inadequate in number of units Too many busses have to make more than one trip, and too much mileage is required of some busses.

## CONSERVATION, FARMING

By GEORGE PENNEY, Soil Conservation Service

The recent rains have shown the needs for soil conservation practices on thousands of acres of rolling fields in Duplin County.

Stands of tobacco have been damaged by the washing rains and many tons of hard-to-get fertilizer as well as thousands of tons of fertile top soil has gone down the hills to further fill our already overflowing ditches and streams. If this erosion is allowed to con-

We urgently need eight additional busses before school starts next year in order to improve bus service to the children of the county We are trying to cover the county with 14 negro busses. This is impossible. No child should have to leave home before daylight, nor return home after dark.

Our repair program has not been able to do the job because of lack of money and mateials, Until year before last, no outside painting was done since W. P. A. days. We have done practically no inside painting in ten years. We have not been able to paint the outside of all of our buildings and in some instances roofs have gone bad before our budget could pay for a new roof.

The Board of Education has spent its budget wisely and economically. There simply has not been enough money to do the things that needed to be done. We believe that our present request for additional funds abould be granted in spite of an increase in tax rate. We are convinced that the people of Duplin County are willing to pay for more adequate school plants, furniture, transportation, etc. We know that the commissioners will levy such a tax if they feel that the people of the County favor such an increase. So far as possible we want to pay as we go rather than add debt to the county. We believe it wise to get a part of the money now rather than to have to get it when tobacco brings .12 per pound rather than .46 per pound. Our way of thinking convinces us that this is good business.

The Board of Commissioners and the Board of Education will June 3, at 2:00 P. M., to give further consideration to a school budget for the 1946-47 fiscal year, and will at that une discuss the tax rate for next year. If you wish to advocate an increase in rate, or to register a protest to the increase you are invited to attend this meeting.

Some of the Duplin County farmers have made a start in trying to conserve our soil.

Mr. L. W. Outlaw, our Soil Conservation District Supervisor, has built some terraces, planted erosion resisting crops, such as Kud-zu and Sericea Lespedeza, on lands that were badly eroded and constructed diversion ditches to keep the road water from washing his pasture away.

Mr. N. P. Blanchard has built ome of the first terraces in the Chinquapin area and is running his rows around the hill with terraces instead of straight across the
