Uncle Natchel's FERTILIZER TALK

Farmers in our section always put mixed fertiliz' under their cotton and side-dresses with natchel Chilean soda. Three years ago, they couldn't get no oda and had to leave off the side-dress. That year for the first time we had plenty of rust.

Next year, we got our soda again and done like we always done before. And we didn't get no rust at all! Somebody say the soda in natchel nitrate acts jes like potash on rust. Maybe that's how come we got rust when we didn't get to use no soda.
