

Single-Story House Has Plenty of Space

This house has three bedrooms and a well-planned activity area to provide plenty of family living space. It was designed by Architect Walter T. Anicka, 617 Forest St., Ann Arbor, Mich., and is his Plan No. 712.

Overall width of the house is 58 feet. A 65-foot lot or a 50-foot corner lot would be required. Mr. Anicka, who is consulting architect of American Builder magazine, gives the area of the house as 1,310 square feet and the cubic content as 15,720 square feet, figures useful in estimating approximate construction cost.

Exterior sidewalls would be of wood or cinder block, painted white. The architect recommends a roof of fire-resistant asphalt shingles, offering the owner a wide choice of colors for enhancing the attractiveness of his home.

The living room-dining room combination forms the nucleus of the home, and the spacious terrace is convenient for outdoor living. The kitchen is readily accessible to the utility room and

the garage and contains a built-in breakfast set. Cupboard space in the kitchen is abundant.

As an economy measure, the basement is eliminated and radiant heating is provided. However, the house could be built with a basement if desired.

Detailed plans and specifications are available from Walter T. Anicka, 617 Forest St., Ann Arbor, Mich. Refer to Plan No. 712.)

at Monterey and a member of the first constitutional convention. While a citizen of Duplin he wrote lengthy descriptions of his observations of Southern people.

General James Kenan, near Baltic station, between Warsaw and Clinton, pointing out the home of the two miles north. He was a Revolutionary leader and did conspicuous service in the vicinity of Fayetteville, Pee Dee (S. C.), Wilmington, Rockfish and elsewhere. He was a legislator, member of constitutional conventions, brigadier-general of State militia, and a trustee of the State University.

Confederate Sword Factory, in the western edge of Kenansville, marks the spot where stood an arms and ammunition factory during the War Between the States. It was destroyed by a detachment of Federal troops from New Bern during an invasion of the section in July, 1863. A company of Confederate cavalry was completely surprised and several made prisoners.

SPORTS AFIELD

By: TED KESTING

Many a good shot who knows his ducks one from another as far as he can see them in flight, never troubles to distinguish between the helpful and the harmful hawks. At the sight of a "hawk" he bangs away and nine times out of ten it's a beneficial mouse hawk he kills and leaves hanging on a fence.

Donald Cultross Peattie, this country's best known nature writer, reports that he has never yet seen a Cooper's hawk or a goshawk punished for its depredations. And these are your poultry and game bird killers.

Let's get to know this fellow, He is a little smaller than a crow, and the female is crow-size or a bit more—18 to 20 inches from the short curved beak to the tail tip. Coopers are slim and trim compared to any other hawks. In perching they have a curious, ugly look—hump-shouldered, with neck hanging and beady red eyes watching.

When they fly they don't, like the beneficial hawks, go soaring up in wide circles or shoot in a long glide while whistling boldly. Its flight is business-like and performed in stolid silence. The bird flaps a few strokes, then glides, then flaps again, in a crow-like fashion.

The important thing is to be able to tell the Cooper from the innocent hawks when, gun in hand, you see it from beneath as it hangs in the sky. The Cooper has short, round wings, but a long slender tail. Most other hawks have either (a) short, round wings and short, broad tails, or (b) long, pointed wings and long slender tails.

Only a few other hawks have the Cooper's (chicken hawk, the big blue darter) combination of short, broad wings and long slim tail, and

Safety Code for Skaters

- 1 Skate only where it is safe.
- 2 Be careful and courteous to others when skating.
- 3 Keep skates clean and in good repair.
- 4 Keep straps clamped tight.
- 5 Don't take chances when skating.
- 6 Keep skates stored in a safe place.
- 7 Don't climb stairs while wearing skates.
- 8 Don't hang on to the back of moving vehicles.
- 9 Keep out of traffic.
- 10 Never skate when carrying pointed or breakable objects.

Roller skating, popular during warm weather with the small fry set, is blossoming from coast to coast. And to make certain that the healthful pastime incurs no risk, Winchester, a roller skate manufacturer, has provided youngsters with their first "ten commandments" for skating safety.

one of them is the also harmful goshawk. It is a much bigger bird, 22 to 24 inches on over-all length; he further differs from the Cooper in having a squared-off tail tip, not rounded.

Neil Bolton Attends School During Vacation

Neil Bolton, Agricultural agent for Tide Water Power Co. spent a very profitable vacation this year when he attended the Reppert School of Auctioneering. He has just returned from Decatur, Ind., where he graduated from the school which teaches every phase of auction work.

Bolton said that 24 of America's foremost auctioneers were present to teach the prospective auction men. Bonafide sales were conducted every day in an auction house so that the students would have actual experience under the guidance of their instructors. Every type of auction was held, from real estate to purebred cattle and hogs. Bolton has added this talent to his many other agricultural pursuits, and hopes to be of real help to the people in Tide Water's territory. He said that if any 4-H group

tions, he would be glad to act as auctioneer. In fact, he is available to any charitable organization that wish to raise some money.

The Reppert School of Auctioneering is unique in the United States, and article telling of its activities will appear in the Saturday Evening Post in the next month. It attracts many students from all parts of the country. This year, there were 144 attending from 34 states. When the graduates receive their diplomas, they are already seasoned auctioneers.

Not Much Profit

A small railroad line, running from Parkdale, Oregon to Hood River, Oregon has reported its total passenger revenue as being \$2.60 in 1945; \$2.35 in 1946; 35 cents in 1947 and 20 cents in 1948.

salts. Mrs. Laughton Albertson won low score prize, a bath cloth. Cold drinks, mints and nuts were served during games and at the end congealed salad and tea. There were two tables in play.

A Barred Plymouth Rock hen at N. C. State Poultry Farm has laid 1,029 eggs since she first came into production.

Worried About Tax In Wilmington, Ohio, a man told police he stole \$480 to help pay his \$110 income tax bill. Total cotton acreage in the U. S. is estimated at 26.3 million acres.

DUPLIN'S HIGHWAY-HISTORICAL MARKERS

Inscriptions were recently approved for markers to Thomas O. Larkin General James Kenan and the Confederate Sword Factory

By: A. T. OUTLAW

Duplin's highway-historical markers are part of a State wide program started several years ago. They are of the regular design as used by State authorities for marking spots of historical importance along highways of the State. The first of the markers in Du-

plin is at the old Grove Church in Kenansville and calls attention to the fact that this church was founded by the Scotch-Irish who came to the section from northern Ireland about the year 1736. The Colonial Records of North Carolina by Saunders, and other reliable records, bear witness to the fact that it is

the oldest Presbyterian organization in the State.

The second marker is near the home site of the Reverend Hugh McAden about one mile east of Kenansville and near the site of the original Grove church. McAden was the first Presbyterian missionary to settle in North Carolina. Of Irish or Scotch-Irish parentage, he came here from one of the northern states, first as a missionary, and then as a resident minister, having been duly ordained in Hanover Presbytery (Virginia and Carolina) at a meeting in old Rockfish church in what is now Nelson County, Virginia. His work here covered a period of about ten years and an inestimable amount of good followed the teaching and preaching of that saintly man. He moved to Caswell County where he died during the year 1781.

The third marker is near the site of the battle of Rockfish and near the present town of Wallace. This was a battle of the Revolutionary war between the British under Major James H. Craig and the Americans under General James Kenan. The Americans were greatly outnumbered and the British succeeded in their purpose to invade this part of the country.

The fourth marker is at a point where the old Sarceta road enters the State highway about two miles north of Kenansville and points out the home site of Dr. William Houston as the man who was appointed by the Lords Commissioners of His Majesty's Treasury as the Stamp Master for North Carolina. By reason of the unpopularity of the British Stamp Act of 1765, he resigned his office during a demonstration in Wilmington, and no attempt was made to enforce the law. It was soon repealed. Doctor Houston was a man of unusual ability and highly respected in his home county.

Inscriptions for three new markers in Duplin have recently been approved and they are as follows:

Thomas O. Larkin, near the town of Wallace, where he lived during the eighteen-twenties. He moved to California, then Mexican territory, and played an important part in winning California for the United States. He was U. S. Consul

Buyers Like 'Package' Cost Of New Home

The "packaged mortgage," in which equipment and appliances are included in the selling price of a new home, is widely appreciated by home buyers and is helping to keep the sale of houses at record levels, according to American Builder magazine.

Advantage of the packaged mortgage, American Builder explains, is that it enables the buyer to amortize the cost of equipment as well as the cost of the house itself over a long period of time. Less ready cash is needed.

A survey made by the trade magazine shows that 80 percent of new houses have built-in kitchen cabinets, 35 percent have gas or electric ranges, 28 percent have gas or electric refrigerators, 18 percent have automatic dishwashers, 20 percent have garbage disposal units and 34 percent have kitchen ventilating fans.

Builders participating in the survey said they include window blinds in 43 percent of their new houses, window shades in 50 percent, mail boxes in 77 percent

Dear Duplin

You are 118 years older than we.. May we congratulate you upon being so young, vigorous, and fine.

Good luck to you always and continued progress for happy centuries still to come.

'Tis Quality That Counts

Sincerely
