Kenansville P. T. A. Met Monday
The Kenansville P. T. A. met Monday night for the first meeting of the year with an unusually good attendance. President W. E. Craft, presided, and introduced the faculty to the parents. New school parents were also recognized.
President Craft introduced Patrolman G. R. Stewart who talked to the group on the Safety Program.
A devotional was given by Rev. Lauren A. Sharpe after which all guests were invited into the hall and served cold drinks and cookies. Parents made a tour of the rooms which were attractively decorated for the fall season.

The 1960 Ford Sunliner is one of 15 models in the new Ford line which will be introduced October 8 in Ford dealer showrooms across the nation. Featuring the strikingly modern rear deck and shoulder and head room than before. Ford's new integrated design, harmonizing the interior with a single, flowing exterior styleline, is proof that modern styling need not be radical or eccentric.

New Ford Will Feature Advance Lines In Styling; New From Front To Rear

The 1960 Ford represents a styling theme originally created for later use but brought forward because of the spontaneous enthusiasm of company management when they first saw the car in advance studios.
J. O. Wright, Ford Motor Company vice president and Ford Division general manager, said the 1960 Ford was redesigned from bumper to bumper because "we wanted to increase passenger space and comfort and improve the roadability and handling ease and performance."
He said, "After the car originally planned for 1960 was well under way, the advanced styling office showed us some designs for Ford Motor Company cars even farther advanced than our planned 1960 model.
"One of these was called 'Quickaliver,' he said. "It captured everyone's imagination immediately, and we began to explore the possibility of advancing it to the 1960 models. We were faced with a crucial decision involving millions of dollars."
"When the engineers pointed out that a complete new car also would enable them to design additional quality features into the vehicle, company management gave the go-ahead."
"One of the most important features of the new Ford," Mr. Wright said, "is that it has been 'comfort-engineered.' There is substantially more hip room, shoulder room, leg room and head room in the 1960 Ford than there was in the 1959 model—which ranked far above its competitors in these vital comfort areas."
"With the new body design, the new frame, redesigned suspension and improved power train, the 1960 Ford rides better, handles better and performs better than any Ford in history," Mr. Wright said.
"Passenger comfort and convenience have been given particular attention in the design of the new Ford cars. New, swept-back windshield pillars have eliminated the troublesome 'dog-leg' found in cars with the full-nuts and coffee to Mesdames Wallace, Boney, F. W. McGowan, D. S. Williamson, Ellis Vestal I. C. Burch and C. B. Guthrie.
