### Mary MacMillan Begins College

Yellow Spring, O. - Fourth of July had a new meaning this year for Mary C. MacMillan, daughter of Mr. and Mrs. Cornelius C. MacMillan of Teachey, and May graduate of Wallace-Rose Hill School. Usually the holiday marks the official start of summer vacation. But for Mary this year it marks vacation's end. As a member of the first class to enter Antioch College under a new year-round program of operation, she reported to campus July 5 for a week of orientation before classes began on July 10.

The liberal arts college, famed for its cooperative program of study-plus-work, is one of the first private colleges in the country to require that all students participate in a full 12-month schedule.

By utilizing a year-round calendar and the co-op plan, Antioch can split its student body into two colleges of about 750 students each, using one campus, one plant, one faculty. While members of "College A" are on campus studying, those from "College B" are off campus on jobs secured for them in any one of 30 states or 14 foreign countries. Periodically, the two groups trade places.

Antioch's desire to take its fair share of rocketing enrollment, together with the recognition that efficient use of college resources will keep costs down, motivated the change.

Half this year's class, or 225 students, begin their college studies on July 10. Another 225 begin classes Oct. 10. From there on out each group will alternate periods of study on campus with periods of work off campus.

At Wallace-Rose Hill High School, Miss MacMillan served as feature writer on the school newspaper and was a member of the honor society and Library club.

MRS. ELEANOR Q. WATTS

### Dr. Watts At Bowman Gray

A new field director for the North Carolina Heart Association will be working in this area, according to an announcement today by W. James Logan, executive director of the state Heart organization in Chapel Hill.

She is Mrs. Eleanor O. Watts of Chapel Hill, a native of New Jersey and a graduate of Woman's College of the University of North Carolina, with a B. S. in Chemistry and Nutrition. She worked for two years at WGNi in Wilmington, writing and planning women's radio program; was advertising manager at Tidewater Power Company, now a part of Carolina Power and Light Company; and did public relations work for the New Hanover County TB Association. In Atlanta, she was assistant regional public relations director for the National Foundation for Infantile Paralysis and, later, was assistant promotion director for WAGA-TV. She had agency and direct mail experience

### Pamlico Cattlemen Reveals Secret Of His Good Fence Construction

BAYBORO-When visitors stop by the Don Lett cattle farm here in Pamlico County, they are usually interested in his cattle or pasture. But chances are something else will quickly catch their eye; Lee's fences.

Line wires are tight. There are no visible braces at end posts. And the fences were not put up recently. Some of them are 10 years old. The barb wire may be rusty, but it's still tight.

H. M. Ellis, in charge of extension agricultural engineering at N. C. State College, was one of the recent visitors to the Lee farm. And like most other people, he came away impressed by the fences.

"Mr. Lee combines some of the better principles of good fence construction with some money-saving shortcuts," Ellis said. "The result is fencing that other cattle men may find profitable."

First, Lee uses nothing but pressure-treated creosoted posts. His end and corner posts, which are about four inches, are spaced 12 feet apart and 2 to 2 1/2 feet in the ground.

A unique feature of Lee's good fencing is his bracing in his braces are placed 3 1/2 to 4 feet in the ground. His line posts, which are

in New York, plus work in nutrition which involved running a test kitchen and making up a recipe book.

She and her husband have two children, Mary Ellen, who is a sophomore at East Carolina College and C. J. Watts, 3rd, who is a student at Georgia Military Academy.

The countries which Mrs. Watts will service for the Heart Association are: Alexander, Beaufort, Bertie, Brunswick, Chatham, Duplin, Greene, Jones, Lee, Lincoln, More, Pender, Person, Polk, Robeson, and Sampson.

"The job of a Heart Association field director," stated Logan, "is to help interested citizens develop community Heart programs, to bring up-to-date information concerning heart disease to local physicians, and to assist in educating the public on the facts about disease to local physicians, and to assist in educating the public on facts about diseases of the heart and circulation. In addition, Mrs. Watts will help Heart volunteers build a campaign structure for raising Heart Fund dollars to finance these programs and support the research programs of the American and North Carolina Heart Associations," he concluded.

Lee firmly believes that a cheap fence that requires continuous maintenance is the most expensive fence to own. By building them better they last longer, he says.

Even with his good fences, Lee occasionally gets an animal that won't respect them. When this happens, he gets rid of the animal as soon as possible. It saves maintenance labor, he explains.

A telescope being built in Virginia - one of the world's largest - will use 20,000 tons of structural steel. The curved reflector of the dish-shaped instrument will be as wide as two football fields laid end to end and will permit study of stars 600 light years away.

By Dr. S. H. Hobbs, Jr.

### Prediction That Successful Farmers Will Apply Business Methods To Farming

The decade of the 1960's saw changes in North Carolina agriculture take place faster than most people had expected.

Dr. S. H. Hobbs, Jr., a rural social economist at the University of North Carolina, believes six basic trends stood out above all others. They were: (1) a rapid decline in the number of farms; (2) a large

gain in the size of farms; (3) tremendous gains in mechanization and push button farming; (4) rapid trends toward large scale agriculture with fewer farmers marketing larger percent of farm products; (5) rapid decline in farm tenancy and (6) large increase in the value of farms.

While the rapidity and magnitude of agricultural changes in recent years may have startled many people, Dr. Hobbs believes these changes will be even more "substantial gains in mechanization," he predicted. "There will be further consolidation of farms, and there will be more specialization of farm production.

"There will be considerable gains in integrated farming, such as has been developing in the Middle West in recent years."

Dr. Hobbs also predicted that farmers who stay in business will be more highly trained and will have more initiative and imagination. Farmers will convert more of their edible crops into livestock and poultry products. And fewer and larger farm operations will be found in livestock, poultry and vegetable production.

"Probably the best word to express successful farming in the future is 'businessness,' which simply means applying business methods to the business of agriculture," he said.

Dr. Hobbs also believes, "We will always have family farmers and even a large number of subsistence and nondescript farmers, but the market place is being and will be taken over by a small per cent of farmers who are business men as well as agriculturalists."

"This may not be what many people would like to see take place," he concluded, "but the trends of recent years definitely point in this direction."

## LEGAL NOTICE

### NOTICE OF TAX SALE

NORTH CAROLINA  
DUPLIN COUNTY

UNDER AND BY VIRTUE OF AUTHORITY of a judgment entered in the Superior Court of Duplin County, North Carolina, in that certain Civil Action entitled: "DUP- LIN COUNTY -VS- ODELL HIGHSMITH AND WIFE, VERTIE REE HIGHSMITH, AND J. MCCOY TEACHEY, trustee," and being Civil Action Number B-11064 duly filed in the office of the Clerk of Superior Court of Duplin County, North Carolina, the undersigned Commissioner will offer for sale for cash to the highest bidder at the courthouse door in Kenansville, North Carolina, at the hour of 12:00 noon on the 14 day of August, 1961, the property described in said judgment, and said lands being situated in Island Creek Township, Duplin County, North Carolina, and being described as follows, to-wit:

Being the same lands as set forth and described in a deed of trust, dated January 16, 1954, from Odell Highsmith to J. McCoy Teachey, Trustee, and recorded in Book 485 page 227, Registry of Duplin County.
