A CHEESE FOR EVERY TASTE

There's a cheese to suit every taste and every need. But which cheese for what purpose?

Here's a guide for using the more common varieties.

The old favorites - Cheddar, Swiss, and Provolone of the firm ripened varieties - are good for appetizers, sandwiches, snacks, and hot dishes.

Semi-soft cheeses - Bel Paese, Brick, Port du Salut, and Muenster - make good snack time eating. They're just the right consistency to serve in chunks with chips and crackers.

If you're looking for a cheese to spread, choose Camembert or Limburger. Blue, Gorgonzola, and Roquefort also make a tasty spread. If you thin them a little with cream.

Blue, Gorgonzola, Gouda and Edam are good as dessert cheeses. So are any of the semi-soft ripened varieties.

Use the hard Italian cheeses like Parmesan and Romano, for grating.

Cottage Cheese is a salad favorite - and with fruits, vegetables, prepared a green pepper stuffed with cottage cheese. Cut in slices about 1/2 inch thick and place on top of the tomato. In the center place a star shaped piece of pimento with Mayonnaise.

or nuts it can be turned into a tasty dip or sandwich spread.

All of these cheeses whatever your choice - are good for your health and easy on your budget. In June when milk and dairy products hit their production peak, cheese is one of our best food buys.

NLRB Authorizes 2nd Union Election Carolina Tel & Tel

Tarboro - The National Labor Relations Board has directed a union election among Traffic Department employees of Carolina Telephone.

This action followed a hearing relative to a petition by the Communications Workers of America (CWA-CIO) to become sole bargaining agent for the company's traffic employees.

The Traffic Department is responsible for handling the company's long distance and information services.

Testimony in connection with CWA's petition was presented both by the company and the union before an NLRB representative in Tarboro on June 1. The purpose of

the hearing was to determine whether an election should be held and, if so, which employees should be considered eligible for union membership.

During the hearing company witnesses stated that Traffic Department service assistants and instructors are charged with supervisory responsibilities and considered part of management by the company. Supervisory employees are not eligible for union membership.

The company also maintained that an election should include all eligible employees of the Accounting, Engineering, and Commercial Departments.

The NLRB decision, however, defines service assistants and instructors as non-supervisory. As such, they will be eligible to vote in the

election. In addition, the NLRB directive exclude employees of the Accounting, Engineering, Plant, and Commercial Departments.

Although the NLRB's directive authorizes an election, the date has not yet been set. The date will be established at a conference of company, union, and NLRB representatives.

This is the second recent attempt by CWA to organize a group of Carolina Telephone employees. On May 4 the company's Plant Department employees rejected affiliation with the union by a vote of 381 to 164.

The true reformer will not only hate evil, but will earnestly endeavor to fill its place with good. Charles Simmons

WHEN THE ENTERPRISE MAKES KNOTS you can actually see your tax dollars at work—working usefully . . . paying for America's world-wide defense. That kind of defense costs many billions. The nation is much better able to pay for it when the government cuts out needless spending. Yet some people are urging the federal government to build more electric plants and lines. This is unnecessary. Investor-owned companies—like CP&L—can supply all the additional electric power required for a fast-growing America. Electric power is a field where the government can save your tax dollars—not spend them.
