Federal Hwy. Tax

Federal highway use tax collected from owners of trucks and buses go in a highway building program. In addition to the Federal highway use tax which affects truck and bus owners, revenues from taxes on motor fuels, tires, inner tubes, retread rubber and other items are being funneled into the highway fund.

Highway use taxes on trucks and buses range from \$81 to \$180 annually for each vehicle subject to the tax. All trucks operating on public highways are subject to this tax if they meet certain unloaded weight and axle specifications and are registered by state law.

Federal tax return Form 2290, necessary for filing, contains a listing of the specific tax to be paid on trucks according to the month the vehicles was put into operation. Form 2290 also described the tax to be paid by bus owners.

For buses, the tax is based on unloaded weight of the bus, plus 150 pounds for each unit of seating capacity. This applies primarily to operators of intercity buses. Local transit systems are exempt from the tax under certain conditions. Details and information are available at local Internal Revenue offices.

Tax Forms 2290 were mailed in June to those who filed highway tax returns last year. Copies of this form, as well as a helpful booklet on the tax, Publication No. 349, can be obtained from local Revenue offices and from state motor bureau agencies.

Tax returns for the year beginning July 1, 1962 must be filed by August 31, 1962 for every taxable vehicle in highway use in July of this year. The tax may be paid in quarterly installments. Dates for these installments are August 31, December 31, March 31 and June 30.

Truck and bus owners should also remember that vehicles acquired after they have filed their 1962 return are subject to the highway use tax this year. In these cases, a tax return (Form 2290) must be filed by the last day of the month following the month a truck is put into highway use.

Revenue collected from the highway use tax totaled 46.8 million in 1961 and \$37.7 million in 1960. Increased enforcement efforts are planned to get fuller compliance with this tax law from truckers and bus operators.

The highway trust fund in 1961, counting proceeds from all of its revenue sources, received a total of \$2.8 billion. The largest contributor to this fund were motor fuel taxes, which accounted for \$2.3 billion. Annual accumulations in the highway trust fund since it was created in 1957 total \$11 billion. The amount contributed by the highway use tax during this period was \$177 million.
