And that is the unique advantage of flameless electric homeheating.

Since there is no flame, there are no products of combustion such as moisture, soot, grime or smoke. Electric heat consumes no oxygen thus insuring a clean, constant, healthful supply of air.

Still further, you gain the distinctive benefit of room-by-room control which only electric heat provides. If you are wondering how it compares in operating cost, just ask your CP&L representative to show you case histories and actual operating records. In this way, you can prove to yourself that flameless electric homeheating costs no more than older methods of flame-type heat.

Remember—only flameless electric heat provides matchless Medallion Living.
