APPRECIATION

Our appreciation is extended to all Committeemen who served during the past committee year for their good cooperation and help in administering the USDA programs that have been assigned to us.

To all Committeemen who took office on October 1, 1965, we want to congratulate you and are looking forward to working with you during the coming year.

To the Farmers in the county, we want to thank you for the fine cooperation that you have given us this year.

FARM BILL

The Senate sent to the White House on Wednesday of this week a four year farm bill. Senate passage of the final version of the legislation was by voice vote following House passage last Friday.

The bill contains four year programs for cotton, wheat, feed grains, rice and wool. It also contains a new long range cropland retirement program.

It will probably be sometime after the bill is signed by the President before we will have the provisions of the bill. All farmers in the county will be notified as soon as we receive the official information in the county office.

ASCS STATE CONFERENCE

The North Carolina ASCS State Conference of County Committeemen and county office employees will be held in Durham on October 19, 20, and 21.

Rural Areas To Benefit From Water Funds

More than a million people in rural America may benefit from an expansion in financial support for rural community facilities and family farms authorized by recent legislation, Clarence H. Sink, Farmers Home Administration County Supervisor for Davie County said today.

Private investors will provide the bulk of the funds on an insured basis through USDA's Farmers Home Administration.

The legislation signed into law by President Johnson on October 7:

Authorizes an increase from \$200 to \$450 million in the Farmers Home Administration's ability to insure loans in any one year for rural community facilities including water supply and waste disposal systems, and for the development and purchase of family farms.

Provides, for the first time, this type of credit for rural waste disposal systems.

Authorizes, for the first time, grants to supplement this type of credit for rural water and waste disposal systems. Grant authority may not exceed 50 percent of the construction of a project nor a total of \$50 million a year.

Authorizes, for the first time, grants totaling \$5 million a year for comprehensive planning of water and sewage sys-

tems. Increases population from 2,500 to 5,500 the size of towns eligible for such assistance.

Increases from \$1 to \$4 million the maximum size of a loan, or a combination loan and grant for water supply or waste disposal systems.

The County Supervisors of the Farmers Home Administration serving the 100 counties in North Carolina are being notified to accept applications under the expanded credit authorities. Grant assistance will not be available until funds are appropriated by Congress.

Applications for rural community facilities loans may be made by public bodies and nonprofit private organizations.

The \$450 million in insured loans plus the \$55 million in grants authorized yearly by the Act can help an estimated 800 rural areas in the nation containing approximately one million people obtain needed water and waste disposal systems and other facilities, and provide 18,000 farm families with credit needed to secure their foothold on the land.

With this expanded authority we can be far more effective.
