

WISDOM AND WIT

Money talks, and the larger the means the clearer the meaning.
 Many a man has broken himself by too precipitate a leap into notoriety.
 A man may be legally attached to one woman and yet sincerely attached to another.
 It is sometimes more important to get credit from a good tuffer than to get credit for a good deed.
 The one occasion when a man will probably refuse to be paid back is when someone has borrowed his wife.
 We find that we are not alone in thinking that it is dreadfully difficult to have a really good time with really good people.

People who think of nothing but their pains invariably consider people who think of nothing but their pleasures incorrigible.
 When a man tells one woman that he did not mean what he said to another woman, he probably does not mean what he says.
 Once upon a time a man was not accepted in society unless he was known to have a sense of humor, but nowadays a sense of humor is much more essential.
 In these hard times everyone is economizing, and we have heard of several ordinarily extravagant women who are now making one man do for both husband and lover.

MAKING HOME ATTRACTIVE

Make over the house so that there may be a bathroom.
 Have as much music as possible. A phonograph is a good investment.
 Read books, papers, and magazines. There is no company like a good book.
 Replace the old household methods by modern labor-saving devices as far as possible.
 Have a better arrangement of the kitchen so that there may be running water and drainage.
 Indulge in an occasional trip either to nearby or distant points. On returning, the home will be much more attractive.
 A recent writer on "What the Farm Home Needs" makes a few suggestions for making the country home more attractive and pleasant:

CULTIVATING SPEECH

- Clear your mind of clutter.
- Plow through the books.
- Harrow up your feelings.
- Dig up metaphors.
- Hoike over old discussions.
- Weed out unnecessary words.
- Sow seeds of dissonance.
- Plant flowers of thought.
- Prune your sentences.
- Do some hedging.
- Then be prepared to fence.

Should you reap a crop of abuse?—George B. Morewood in Judge.

LITTLE ONES

In an argument some people never give in and some never give out.
 On the other hand, we are also the architects of our own misfortunes.
 There are times when the descent of man seems to consist of falling in love.
 Love is a cottage in all right if the cottage is so small there is no room for doubt.
 Some men are such unbelievers that they actually would question the sex of the devil.
 Many a woman who thinks her face is her fortune doesn't have to envy any burglary insurance.
PELLETS OF TRUTH
 It's an easy matter to nail a lie, but you can't always keep it down.
 It's all right to see in the world, but don't go up to the sky-line's outside.
 Many a man's best economy is to save the pennies and spend the dollars.
 The use of mirrors may have been invented, but many a man turns night into day.
 Some people want entirely too much for nothing for the unexpected.

GOOD USE FOR A ROAD DRAG

Implement is Light, Easily Handled and Should Be Worked Soon as Possible After Each Rain.
 There exists a prevailing opinion in the minds of those who have used the KING road drag that the persistent use of this simple drag will do the ordinary earth roads more good for the amount of time and labor required than any other method of working ever proposed. Some of the best earth roads have been made good by the use of this simple implement. In fact, some advocates of the drag claim that the trustees of many townships could well afford to sell the heavy road machines to a junk man and invest the proceeds in a number of split-

Perspective View of Splitting Drag.

log drag. Seasonable use of the split-log or similar drag or the like use of any road-working implement will not make bad roads good. The drag is light and easily handled and should be used as soon after each rain as the condition of the surface will permit. The job was quickly finished and the results are surprising when the dragging is carried on throughout the year. Possibly the most marked improvement from the use of the road drag will result from the early spring dragging.

BUILDING MORE GOOD ROADS

America Now Has 5,000 Miles More of Improved Highways Than France—Total Now 31,000 Miles.

According to the Good Roads Year Book of the American Highway Association, recently issued, America now has 5,000 miles more of good roads than France, the total for this country now amounting to 31,000 miles.
 Of this 5,000 miles were built in 1915 and about 2,000 in 1914, making a total of over one-third of the entire mileage of the good roads of the country.
 New Jersey was the pioneer state to provide state aid for public highways in 1891, and Massachusetts and Connecticut soon followed, but it is only during the last ten years that the state aid policy has been in effect to any considerable extent.

PHASES OF ROAD PROBLEM

Those Interested in Work Will Find Joint Congressional Committee Report Quite Handy.

Persons interested in the good roads problem, either from the engineering or the legislative standpoint, will find the report of the joint congressional committee on federal aid to good roads a convenient source of information. It not only contains the most extensive data ever published on this subject, but contains a bibliography which gives a list of books, pamphlets and speeches on all phases of the good roads problem. The report is printed as House document 1510, Sixty-third congress, third session, and copies will be secured by application to members of congress.

Do Road Work Early.
 For good roads the work should be done in the spring and early summer, if possible. Roads worked in the late fall don't get time to settle before winter, consequently are rough and uneven all winter. Do the road work early.

For Best Results.
 The fruit and vegetable garden requires constant weeding and hoeing. Or, if farm work is busy, best for work done and suffers most from neglect.

Plies Cured in 6 to 14 Days.
 Your plies will season better if PLAZO (Lime Sulphur) is used to prevent rot. It kills the fungi, and cures the plies. The first application should be made Sept. 15.

JOB PRINTING—THE JUST RIGHT KIND—JUST PHONE No. 14.

The BIG Warehouse ON MAIN STREET

OWNED and OPERATED by the Farmer, for the Farmer, with the Farmer.

We ask the farmer to help the farmer. You will help the farmer make money thereby building up the country as well as the town. Our business has exceeded our expectations and we are growing every day. Other warehouses in the State operated in the same manner, made money and divided big dividends among the farmers. When the farmer becomes interested in the business he is building a big business, helping the market and helping the town. Hundreds of farmers have taken stock, and as we have no one selling stock those wanting stock will have to apply at the warehouse.

This is a big business, by your co-operation we can make it a larger business. Appreciation of your patronage is shown by Townsend's hard work.

Yours respectfully,
TOWNSEND'S TOBACCO WAREHOUSE CO.

P. S.—Being unable to get out to see friends and patrons, I ask you to get in early with your tobacco, so we can get you unloaded in time for sale. Prices are much stronger, several of my customers averaged as high as twenty cents for large loads of tobacco.

APPRECIATING YOUR PATRONAGE

Your Friend,
C. R. TOWNSEND
 Farmville, N. Carolina.

"Groceries of Quality"
 OUR MOTTO.
