

Now that paved streets are practically in sight the next move for the town and township is that modern brick school building. Let's not put this important matter off longer, but get everything in readiness so that work can commence immediately upon the close of the present term. There is, of course much to be done in advance of laying the brick and the sooner the preliminaries are over the earlier the foundation will be laid and this long needed structure erected. If everything is properly pushed there is no reason why another school session shouldn't find the children more comfortably situated. The present building is an eyesore to the town and a disgrace to the community. Put your shoulder to my shoulder and let's do something NOW. We've waited too long already.

A Plea For The Flowers.

"In the Spring a young man's fancy lightly turns to thoughts of love". With apologies to the author of these words, in the spring the home-makers fancy, not lightly but seriously turns to thoughts of gardening and flowers, especially flowers, and it is well, for what adds to a real home more than flowers well placed? And whenever we pass such a home we instinctively feel that here lives a home-maker not merely a housekeeper. So much for the individual home.

In passing through the different towns on the automobile trips so many of us take now-a-days we find ourselves drawing comparisons between them, naturally. One we find with well kept lawns and bright with flowers and with these conditions we find clean streets and sidewalks.

On the other hand the next town passed is without either, or

if that is putting it too strongly, there are so few well kept homes and streets that they make a very poor showing. If we imagine ourselves strangers passing through Farmville I fear that we should place it in the latter class.

True we have some lovely homes and with beautiful surroundings but there are more of the other kind. Many of us strive to do our part while others seem not to care. The greatest difficulty lies in the fact that most of us own chickens, which is well, for in a small town like ours, it is to each one's advantage to produce as much food as possible. But in spite of a law (which it seems impossible to enforce) forbidding owners to allow chickens to run at large, we are obliged every spring to stand by and see gardens and flowers destroyed, simply through carelessness or thoughtlessness of neighbors. We all know that one mother, her with her young brood can in a few minutes undo the work of hours and days.

If there are those among us who deem chickens of more importance than flowers and vegetables they are of course entitled to their opinion but through common sense and neighborliness why not keep them where they belong and give the other fellow a showing.

Spring is at hand and now lets co-operate and give the flowers a chance.

A Lower Lover.

The Strong Withstand the Winter Cold Better Than the Weak

You must have Health, Strength and Endurance to fight Colds, Grip and Influenza. When your blood is not in a healthy condition and does not circulate properly, your system is unable to withstand the Winter cold.

"Your Nose Knows"

All smoking tobaccos use some flavoring. The Encyclopaedia Britannica says about the manufacture of smoking tobacco, "... on the Continent and in America certain 'sauces' are employed ... the use of the 'sauces' is to improve the flavour and burning qualities of the leaves."

Tuxedo uses chocolate—the purest, most wholesome and delicious of all flavorings! Everybody likes chocolate—we all know that chocolate added to anything as a flavoring always makes that thing still more enjoyable. That is why a dash of chocolate, added to the most carefully selected and properly aged barley tobacco, makes Tuxedo more enjoyable.

"Your Nose Knows"

Try This Test: Rub a little Tuxedo briskly in the palm of your hand to bring out its full aroma. Then smell it deep—no, don't, please! Its fragrance will convince you. Try this test with any other tobacco and you will let Tuxedo stand or fall on your judgment.
