WOULD MORTGAGE VALUABLE REALTY TO MAKE GERMANY PAY HER DEBTS

France Makes Proposal in Fear That Their Indemnity May be Slipping

By FRANK H. MASON

Paris, April 7.—Compulsory mortgaging of all real property in Germany to pay the reparations is the solution proposed by Paul Reynaud, Member of the Chamber of Deputies. Not only would M. Reynaud put a 50 per cent mortgage on houses, but he would also increase the capital stock of every German corporation by one-fifth and present the stock certificates to the commission of reparations.

This is an adaptation of the German proposal of the German Minister Hirsch to the French point of view. Minister Hirsch suggested the drastic program of mortgaging German property and giving the mortgages to the German State. M. Reynaud would present the mortgages to the Allies. H believes that this would represent a capitalization of 40,000,000,000 gold marks on a pre-war valuation.

M. Reynaud's proposal is an indication that the hypnotic slogan of M. Knotz that "The Germans will pay," which was pronounced on every occasion when any question arose regarding th French budget, is gradually being forgotten. France is beginning to realize that there are limitations to the amounts she can collect.

"The French editor of the reparations clauses of the Treaty of Versailles promised in the chamber, in 1919, that Germany would pay from thirteen to eighteen billion gold marks a year. Last May, at London, this sum shrunk to three billion for this year plus 26 per cent of Germany exportations. At Cannes it was proposed to reduce this of 720,000,000 gold marks, plus a few hundred millions payments in goods to France.

Pyramid of Expenses Fixing.

"Thus from eighteen billions we see the German payments approaching zero. This is the inverted pyramid of our illusions, the point of which weights cruelly on us. However, the pyramid of expenses is rising. Eighty billion francs have been spent in return for which we haven't received one franc. The French budget is loaded down with pensions, while Germany is preparing behind a screen of fraudulent bankruptcy. This is the cause of the differences of opinion between France and Europe.

"There can be payments between two countries only in goods and in services. Germany exported three billion imports. Has exported seven or ten billion gold marks during the war. This figure has fallen to three thousand seven hundred million gold marks, according to the official figures of the Interalliet Guarantee Commission. Therefore, Germany can't pay us in currency based on her revenues."
