Some Timely Farm Questions Answered At State College

QUESTION: Where can information on the Corn-Hog Reduction Campaign be secured?

ANSWER: A study of the Corn-Hog reduction plan has been made by W. W. Shay, swine extension specialist at State College and printed as Extension Circular No. 196. In this circular Shay shows the amount of cash payment made by the government and also the amount that corn and hogs must sell for to return a profit equal to the amount of payment offered by the government. Copies of this circular may be secured by writing F. H. Jeter, Agricultural Editor, Raleigh.

QUESTION: What effect will the hatchery code have on a grower who hatches for his personal use and who also hatches a few eggs for his neighbors?

ANSWER: The code does not affect any person who hatches eggs from his own flock but, if the hatching eggs are bought they would have to conform to the code as to weight. The same clause in the code would also affect the grower who accommodates his neighbor by hatching a few eggs. This would, in all probability be construed as custom hatching and the code provides that all eggs custom hatched must weigh not less than 23 ounces to the dozen. Strict interpretations of the various points will be discussed at the Hatcherymen's meeting in Greensboro on January 22.

QUESTION: What fertilizer should be put on a peach orchard that was sown to vetch last fall?

ANSWER: Any fertilizer mixture carrying a nitrogen content equivalent to 100 pounds of nitrate of soda can be used as a top dressing. This should be applied between February 20 and March 1 or about ten days before the trees bloom. A further application of 100 pounds of nitrate of soda or its equivalent should be broadcast when the cover crop is turned under which is usually about April 15. The turning under of the cover crop, however, depends upon seasonal conditions.

FOR RENT—Two story house, corner Barrett and Church streets. Apply to Mrs. Mary Melissa Tyson. The house formerly occupied by Bunn Newton.

FOR FUNERAL DESIGNS, potted plants or cut flowers call Mrs. T. E. Joyner, phone No. 129, representative for Herring Florist, Kinston, N. C.

ANNOUNCEMENT!—Miss Maybelle Allen, R. N., wishes to announce that she is now located in Farmville at the home of Mrs. H. C. Cobb, on Contentnea street, and will be available for bedside duty.

Save Legume Seed To Improve Land

North Carolina agriculture is seriously handicapped by a lack of legumes to enrich the soil. If every farmer should grow his own seed, legume production could be easily increased by 1,000,000 acres in the next two or three years.

"The present scarcity of all kinds of legume seed demonstrates that farmers cannot depend upon the purchase of seed from outsiders to supply their needs," says Enos C. Blair, extension agronomist at State College. "W. A. Davis, Johnston county farmer, has seen the mistake of trying to cultivate land without legumes and has provided for an ample supply in the future. On his 130 acres of crop land, 30 acres were devoted to corn and soybeans last year. He harvested 75 bushels of soybeans without interfering with his corn crop. From 10 acres in cowpeas, he gathered 80 bushels by hand. He also has 10 acres in corn and velvet beans. The latter have not been threshed, but will supply all he needs for 1934. The legume vines will also greatly enrich the soil when turned under." Mr. Blair says any farmer desiring to improve his land, can, with little difficulty, increase his crop of legumes without seriously interfering with his money and food crops. He can start in a small way and continue to harvest planting seed until enough has been secured to plant the desired acreage each year.

Fascinating Facts of NATURE

In the shadow of the Andes Mountains, Nature stored the world's supply of Chilean Natural Nitrate. Nature is your friend. She made your land. She makes your seeds. She created the three plant foods that are the sinews of farming in the South—potash, phosphate, CHILEAN NATURAL NITRATE, the one and only natural nitrate fertilizer.

CHILEAN NITRATE WAS FIRST USED BY SOUTHERN FARMERS WHEN ANDREW JACKSON (OLD HICKORY) WAS PRESIDENT (1829-1837)

Chilean NATURAL NITRATE

The only nitrogen that comes from the ground.

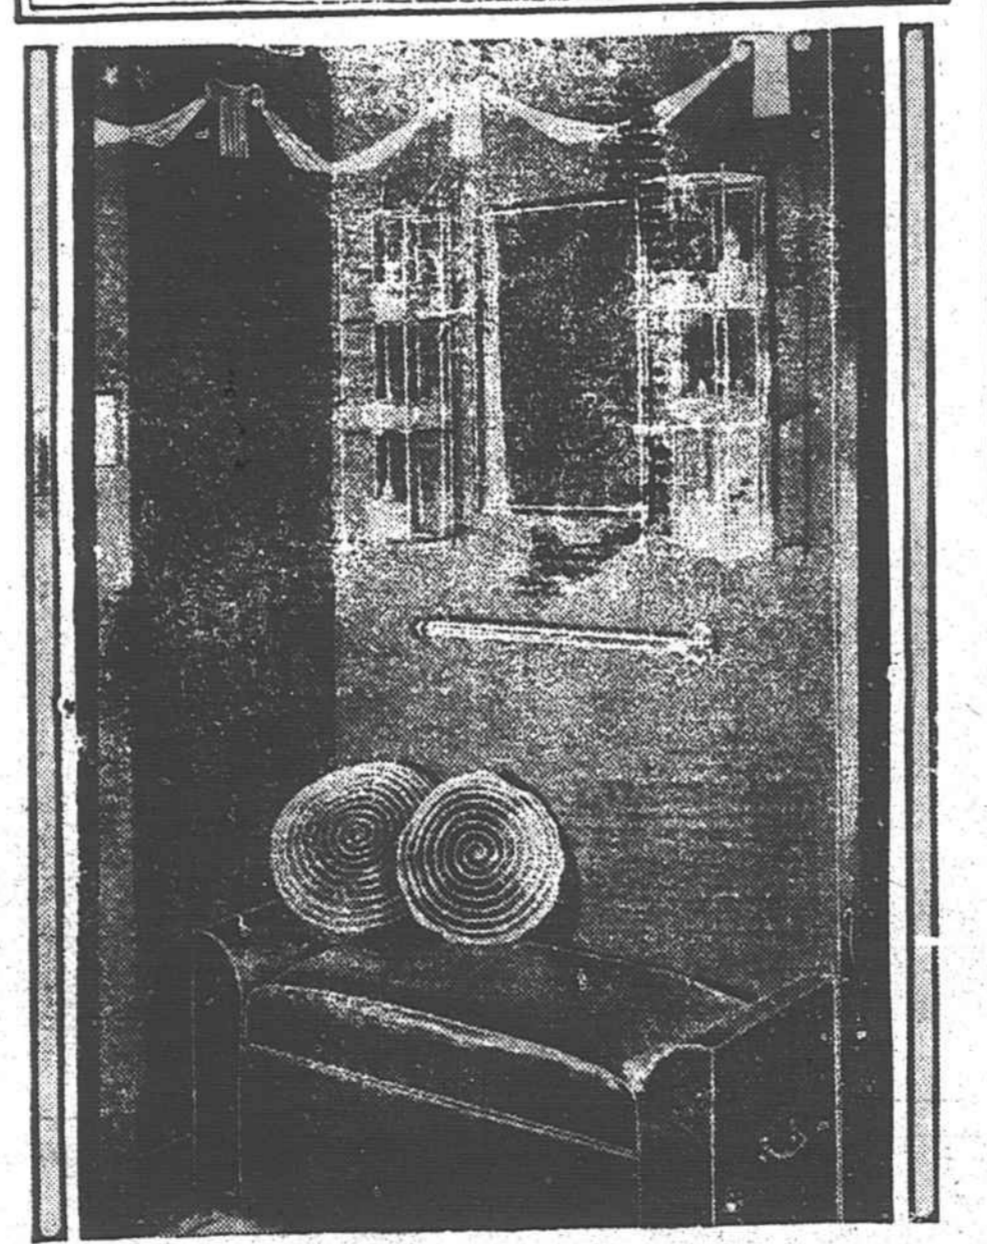

WHAT PRICE SHOULD YOU PAY?

Three tires—each a guaranteed Goodyear—three prices (if we illustrated Heavy Duty Goodyears there would be five prices!)—which is the best buy for you? The answer depends on how hard and how far you will drive your car. Our experience is at your call to help you decide. But no matter what you pay you'll get the best buy at that price when you get a Goodyear. Giving the greatest value gives Goodyear the greatest sales of any make.

BEAUTY in the HOME

Modern Chest-Seat For the Dressing Room

THIS lovely bathroom or dressing room corner is an example of the modern spirit in interior decoration expressed with charming simplicity. The walls are grey with a simple classical dado and a Grecian motif in white. Glass shelves and mirror above the bench are trimmed with chromium which looks very well indeed against the grey wall.

The bench below is a combination seat and chest, the main cushion being removable so that storage room is available. Fabrikoid, with a lovely satin finish, is used for the bench covering. It is in navy blue, piped with silver grey of the same material, and the two round cushions carry out the color scheme, the grey tying in well with the grey of the walls. Such a water resistant and easily cleanable chest-seat would look well in any dressing room.
