N. C. State College.
This practice often results in reduced yields. Cotton left thick in the row will put on more bolls early in the season and will be better able to produce higher yields under boll weevil conditions, an important factor in lint production.
Kime recommended that on the heavier soils of the Coastal Plain area hills should be spaced 10 to 12 inches apart in the row, leaving two or three plants in the hill when possible. This will mean an average of approximately one and one-half plants per foot or 18,000 to 20,000 On the lighter soils of the Coastal plants to the acre.
Plain section and in the Piedmont, the State College cotton expert said a closer spacing of the plants is probably advisable.
Cotton should be chopped when the weather is warm and the plants are healthy. A good indicator of the best time is when the second set of leaves is about three-quarters grown.
Kime explained that if the cotton is chopped much earlier, some of the remaining plants are likely to die, leaving a poor stand. If the chopping is delayed too long, the plants will become tall and slender and will tend to fall down badly when chopped.
"Because of the revived interest in the production of better yields and a higher grade lint this year," the State College man said, "growers should exert every effort to follow recommended practices that will aid in reaching this goal."

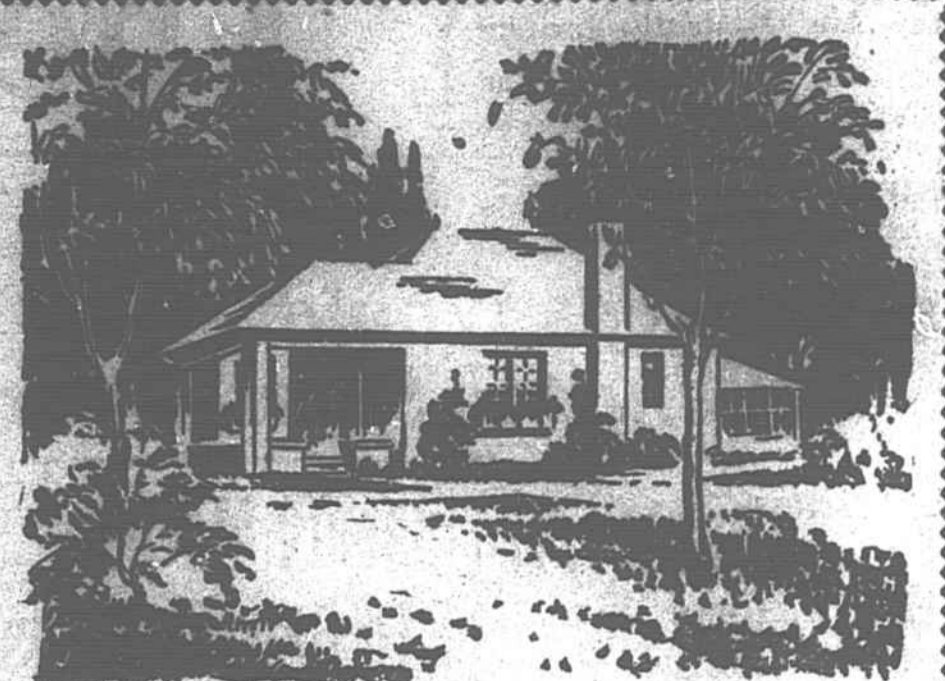

Symphonic Singers To Give Concert Here On Sunday

The Eastern Carolina Symphonic Singers will give a concert Sunday, April 28, at 8:30 in the Methodist Church here under the direction of Lewis Sidney Bullock, of Greenville, outstanding choral director and musician of this section of the State.
The choir is a special chorus composed of 44 selected voices from the schools of Ayden, Snow Hill and Winterville. This group will appear in a recital at the White House, May 14, from 4 to 4:30 o'clock at the invitation of Mrs. Franklin D. Roosevelt. Continuing on a tour to New York, they will give concerts in Baltimore, Philadelphia and Trenton, N. J.
Singing a capella, the choir will present their concert program in Farmville prior to the Northern tour, demonstrating the marvelous possibilities of the unaccompanied trained voices of young boys and girls.
Commissioned by Governor Clyde R. Hoey as Ambassadors of Good Will and Good Music from the State of North Carolina, the group will go on tour to represent the best in choral music in Eastern North Carolina.
The public is cordially invited to attend the concert, at which no admission charges will be made but a silver offering taken to help defray expenses of the tour.

External fashions may change without destroying internal morality.

It is remarkable how people can come to see you at exactly the wrong time.

It is surprising to discover how much young people know, or think they know.

Wise people are thankful that there are fools who do not understand them.

As far as we are concerned, Nature might as well skip these delayed cold snaps.

The trouble with some college graduates is that education has been spread too thin.

Speeches are made for two purposes—to tell the truth and to hide the truth.

Advertising, as we see it, is the cheapest salesman that a business can employ.

It is surprising how fast a month rolls around when you have notes coming due.

One remark that ends more arguments than any other: "It's time to eat."

Every business man or firm in Farmville is invited to join in the 30th Anniversary of The Enterprise.

Rev. Francis McCourt, Pastor
Holy Mass
10:00 A. M.—Every Sunday.

Delegates Selected 4-H Encampment

The two boys and two girls to represent North Carolina's 50,000 4-H Club members at the 14th National Club Camp in Washington June 12-19, have been announced by L.R. Harrell, 4-H club leader of the State College Extension Service.
They are: Margaret Ellis, 18, of Durham county; Sue Parker, 17, of Jones County; Alfred Greene, 20, of Durham County; and Dudolph Ellis, 20, of Cumberland county.
The selection of these delegates came after a careful study had been made of the records of Tar Heel club members. To be named a delegate to the national camp is considered the highest honor that can be offered a 4-H Club member.
Margaret Ellis, the daughter of Mr. and Mrs. A. W. Ellis, Morrisville, Route 1, has climaxed her nine years as a club member by serving this year as president of the State 4-H Council. She has participated actively in club work and has held many offices in her club and county.
Sue Parker, the daughter of Mrs. Leon Parker, of Pollockville, has been a club member for the past six years. In addition to holding high club offices, she has completed projects in clothing, yard improvement, food conservation, wildlife conservation, and foods and nutrition.
Dudolph Ellis, the son of Mr. and Mrs. L. J. Ellis of Fayetteville, Route 6, has been in club work four years and has specialized in crops projects. During this time, he has developed from his peanut project a business which is returning him a net income of more than \$100 a month. He has been active in club work and has held important offices in his club and county council.
Alfred Greene, the son of Mr. and Mrs. J. B. Greene, of Durham, Route 1, has completed nine years of club work, making a total profit from his projects of \$1,027.75.

ADVANCE

The general level of farm wage rates advanced about twice as much as usual from January 1 to April 1, according to the U. S. Agricultural Marketing Service.

UNAFFFECTED

The occupation of Denmark and Norway by German troops probably will have little immediate effect on the exports of farm products from the United States, believes the U. S. Department of Agriculture.

SURPLUS

Despite wartime demands, the world has 1,400,000,000 bushels of wheat more than it will consume during the marketing year 1939-40, reports the Agricultural Adjustment Administration.

ONE-THIRD

To show the importance of cotton in the agricultural scheme of the nation, the U. S. Department of Agriculture points out that nearly a third of the farms in the United States grow this crop.

CONTRAST

During the period from 1929 to 1932, industry reduced its production 59 percent, while farm production, on the other hand, decreased only 6 percent in the same period.

Careful driving doesn't always avoid an accident, but it helps.

Gardening is a splendid exercise, especially if our friends let us sample their vegetables.

MIDGET ENGINES FOR AUTOMOBILES

A new motor fuel, possessing twice the combusive power of gasoline, has been developed.
This makes possible the reduction of automobile engines to half their present size but the change won't occur in the near future because the new fuel has a laboratory cost of \$50 a gallon.
Still, one never can tell when it will be reduced in price. A short time ago the cost per gallon was \$3-800. If it goes on down and the combination of scientific skill and mass production is not to be denied, midget engines will begin propelling our modern motor cars.

PER CAPITA AND REAL INCOME

Figures recently released by the Department of Commerce indicate that the per capita income of individuals in the United States in 1938 amounted to \$515 for the nation as a whole.
It is interesting to note that the average per capita income moved from \$375 in 1933 to \$515 in 1938, and that this figure compared with \$279 in '29.
It should not be forgotten, however, that income, measured in dollars, does not always represent the real income of individuals. This depends upon the buying power of the dollars received. If dollar income moves upward but prices increase faster, then an increase in dollar income does not mean an increase in real income. Likewise, if dollar income declines, but prices drop faster, the real income or buying power of the individual increases.

A NEW WORLD AHEAD

What type of economic system will dominate the commerce of the world when the fighting ends?
The question is getting some attention from officials who have to think about the future as they meet the problems of the present.
If Germany wins, it is plain that there will be a few self-sufficient units. Germany will dominate Europe, Russia will control an immense area and Japan will boss the Far East. In the Western Hemisphere the United States will be in a position of dominance in the Americas.
How the economic blocs will trade with each other is unknown except on a limited scale, probably based on bartering arrangements. Whether they will trade with each other is doubtful, particularly if the blocs continue their rivalry to achieve greater domination of neighboring areas.

Careful Chopping Increases Yields

The many cotton growers make the mistake each year of not leaving enough plants when chopping their cotton, says Paul H. Kime, agronomist of the Experimental Station at
