Farm Production Up; Prices Higher; Cash Income Close To 11-Year Top

### AGRICULTURAL HIGH-LIGHTS FOR NOVEMBER

(By Bureau of Agricultural Economics)

1. For Thanksgiving: Plenty of turkeys, citrus, dried fruits, vegetables; smaller crops of apples, cranberries, nuts. Consumer demand good.
2. Flue-cured tobacco situation improved by marketing quotas.
3. Exports continue very low, bad weather ahead.
4. Prices of dairy products rising on improved consumer demand.
5. Decrease in breeding for 1941 spring pig crop is prospect.
6. Cotton mills busy as never before, but cotton export outlook is bad.
7. Increased plantings of truck crops for fall and winter. Production late potatoes increased.
8. Farm income in last quarter to top 1939 figures.
9. Higher prices for fed lambs; wool consumption increasing.
10. Supply of feed grains per animal on farms the largest on record.
11. New winter wheat crop in the ground; acreage about the same as last year.
12. About same number of cattle on feed this season as last.
13. Supply of apples reduced. Production winter citrus largest on record.

### The Bureau of Agricultural Economics Reports:

Farmers are bringing to a close another year of abundant production, prices of farm products have averaged higher this year to date than in 1939, cash farm income for 1940—estimated at 9 billion dollars—is the second largest since 1929.

The bureau said that domestic demand for farm products continues good, and is expected to increase in 1941. In best position are farmers producing chiefly for the domestic market. Exports continue to decline as continental European markets have been cut off by war blockades. United States exports of farm products will continue to be small through 1941.

Plans for 1941 farm products are now being made, with prospects that the total output of agricultural products will be about the same as in 1940. Favorable price and income outlook for 1941 is contingent, the bureau said, upon maintenance of current agricultural adjustments by farmers in order to obtain maximum benefits from increased domestic demand. Supplies of food, feed and fibers are fully adequate for current needs plus carryovers.

The bureau reported that FARM CASH INCOME is declining seasonally, but that the total compares favorably with 1939 figures. Income may be slightly larger than in the fourth quarter of 1939 when total from marketings and government payments was about \$2,275,000,000. Prices of practically all farm products except hogs and chickens averaged higher in the first 10 months of this year compared with last.

### STOPPED

War in Europe has virtually paralyzed the cotton textile industry of France, thus shutting off what was the second best European market for United States cotton.

### "Build-Up" for Women Helps Avoid Distress

Do you suffer periodically from headaches, nervousness, irritability, cramp-like pain?

If so, here's good news! These may be symptoms of functional dysmenorrhea due to malnutrition, often helped by CARDUL. CARDUL usually increases appetite and the flow of gastric juices; so aids digestion and helps build up strength, energy, physical resistance. Result: many less periods of distress. Or you may find this also helps ease your periodic discomfort: Take CARDUL a few days before and during "the time." 50 years of use and popularity invite your confidence in CARDUL.

Advice is easy to give but it is just as easy not to take.

### HIGH-WIRE EXPERT RECOVERS

Baltimore, Md.—Joe Chubb, the high-wire walker who fell while performing at the Shrine circus here last November, has recovered sufficiently to rejoin his former outfit. In the fall he dislocated both arms, fractured a leg, suffered numerous cuts and bruises to his head and face, and other assorted injuries. He was in a local hospital for almost nine months.
