STATE COLLEGE **FARM QUESTIONS**

QUESTION: What are the prosects for getting new farm machinry this year?

ANSWER: Not too bright. The actual production of new farming implements during the last three months of 1945, a peacetime period, was approximately 10 per cent less than in the last quarter of 1944, a war period, Extension Service specialists report.

QUESTION: What are the rates of payment to be made under the 1946 AAA program for seeding Winter cover crops,

ANSWER: State AAA men report the following rates of pay for cover crops seeded with inoculated seed in well-prepared seedbeds. Crimson clover, 15 cents per pound; hairy vetch, 12 cents per pound; Austrian winter peas, 5 cents per pound, and annual ryegrass, 8 cents per pound. QUESTION: Is it really better to prepare tobacco plantbeds in

ANSWER: Extension Service tobacco specialists say positively "yes." Farmers who prepared beds last Fall and applied cyanamid and uramon to kill weeds, though delayed now by wet weather in planting seed, are far ahead of farmers who must prepare beds from scratch.
