**STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS**

**QUESTION:** May North Carolina farmers expect relief through corn shipments from the Middle West for feeding hogs?

**ANSWER:** Very little if any. Mid-West corn is expected to reach this state this year because, while there has been some reduction in the number of sows for spring pigs in the corn belt, the reduction will not be sufficient to match lower feed supplies.

**QUESTION:** What may the average farmer expect to be the of Agriculture Secretary Anderson's plan to revise production goals this year?

**ANSWER:** Since it has already been arranged to request average increases for special crops in areas particularly adapted to the growing of such crops, the plan is not expected to materially affect the overall farm plan in this state. State PMA Director Tom Scott predicts that North Carolina can easily meet its added goal of 46,000 acres of soybeans.

**QUESTION:** Has a definite decrease been established for burley tobacco acreage this year?

**ANSWER:** Yes. A ten per cent acreage decrease has been confirmed for the burley crop.

**Rich Man, Poor Man. Which Will You Be?**

T. J. W. Broom, Union County agent, has concluded from interviews with farmers who pass through his office enroute to conferences with draft boards, that the economic standing of the average rural fellow is measured directly by individual initiative.

Here's what Broom has to say on the subject:

"This week two farmers were in my office at the same time, both enroute to selective service boards. Each man was 50 years old. The first had a wife, two daughters, 14 and 16 years old, and a son, 18. His farming report was as follows: 20 acres of cotton in 1945, yield, 10 bales; 10 acres of corn, yield, 50 bushels; no wheat; no oats, no mixed grain, no lespedeza, no other hay crops; half an acre Irish and sweet potatoes; half an acre of garden; two cows, one hog, 25 hens.

"The other man, a widower, said that his family consisted of his 18-

**FIGURING THINGS OUT "Natchelly"**

Awhile back I was learning Sonny how to handle a shotgun so he could figure out where Brer Rabbit natchelly was going to be on his next jump. Sonny got the idea mighty quick for a boy his age. Maybe it's because he's noticed how us farmers always tries to do things the natchel way. For instance, it just comes natchel to use Chilean soda to give our crops a quick start and keep 'em growing strong and healthy.

Us farmers has been using natchel soda for more than a hundred years. Seems like just being natchel makes it different from any other kind.

Maybe folks won't be able to get all the soda they want this season, but if we're careful with what we get it may do.
