

"JES' HOF IT NATCHEL, SONNY!"

### "DISCOVERING" UNCLE NATCHEL

One day back in 1894, an artist, driving leisurely along a country road in the deep South, heard the sound of banjo music floating toward him through the trees. He left his car and followed the sad-sweet strains until he found a clearing in the forest where, on a little cabin-porch, sat an old dandy, a red-headed boy of twelve, and a dog—in the middle of a music lesson! All unseen, the artist set up his easel and soon, upon the canvas, appeared the boy, all thumbs, his face screwed up in earnest effort, manfully struggling with the stringed instrument; the dog looking on in painful apprehension; the old man patiently urging: "Jes' hof it natchel, Sonny—thataway, natchel!"

This beautiful painting by Hy Hintermeister was featured on the 1935 Uncle Natchel calendar, and introduced to a million people the familiar figure of "Uncle Natchel", the kindly old man who has appeared ever since as the symbol of Natural Chilean Nitrate of Soda.

Uncle Natchel is really a rare and lovable character. Grown old in the employ of Sonny's family, he is known to everyone for miles around for his inexhaustible supply of stories about the wonders of Nature and his belief that the best way to do anything is the "Natchel" way. And that, of course, is how he got his name.

### State College Hints For Farm Homemakers

By Ruth Curran, N. C. State College.

Enriched—restored—fortified—are words often seen on food labels these days. Many homemakers think these words all mean the same thing. But actually, each one has a different meaning say nutritionists.

"Enriched" is a word properly used only for bread and flour. Definite standards, set up by law, of certain food values must be added. Iron and two 'B' vitamins—niacin and thiamine—are put back in about the amounts lost in milling white flour from the whole grain. A third 'B' vitamin—riboflavin—is added in even larger amounts than are found in whole wheat.

Under War Food Order No. 1, all bakers' white bread and rolls must be enriched. This will apply to bread baked with the new 80% extraction flour, so that America's daily bread will be even better than the enriched bread we now eat.

In "restored" foods, nutrients originally present in the food but lost in processing are put back. Breakfast cereals are sometimes restored to whole grain levels by the addition of thiamine, niacin, and iron.

When foods are "fortified" nutrients that were not originally present are added. Almost all margarine is fortified with vitamin A. Milk is sometimes fortified with vitamin D—which the body needs to make best use of the calcium and phosphorus in the milk.

The rules of modern poultry cooking are few and easy to follow, food specialists say. Rule No. 1 is: Cook at moderate heat so the meat will be juicy, tender and evenly done to the bone. This rule holds for birds of all ages and kinds from the spring chicken to the old hen. Turkeys, ducks, geese, guinea and squab have most food value when cooked at moderate heat. Moderate heat is economical of both meat and fuel.

Rule 2 is: Vary the cooking method according to the age and fatness of the bird. For young, tender, well-fattened birds broiling, frying and open-pan roasting are best. For young birds that are very lean, and for full-grown birds, braising in a covered roaster or casserole makes for tenderness. Old birds need long, slow cooking in water or steam to make them tender.

### STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

QUESTION: Is the use of chlorine compound adequate for sterilizing dairy utensils?

ANSWER: John A. Aray, Extension dairyman, answers "yes" but lists three steps to be followed. First, cans must be cleaned with a cold water rinse; second, be sure the chlorine solution is the right strength by following manufacturer's directions; third, keep utensils immersed in solution at least 30 seconds.

QUESTION: What is indicated by the presence of broom sedge on land?

ANSWER: Agronomists say that this means the absence of some desirable crop. In pastures, it means that because of low soil fertility or mismanagement, the better grasses and legumes have been eliminated. Such land should be limed, fertilized with about 500 pound of 0-14-7 fertilizer to the acre, and reseeded.

QUESTION: When should small grains be top-dressed?

ANSWER: Applications of nitrogen top-dressing should be made during March, taking care to make the distribution even. If the top-dressing is applied unevenly, dark and light streaks will be observed in the field a few days after it is dressed. The equivalent of 80 pounds of nitrogen to the acre is recommended for corn.

### NOTICE OF SALE

Under and by virtue of the Power of Sale contained in Chapter 160, Article 6, Section 59 of the General Statutes of North Carolina (1943), the Town of Fountain will, on Monday, May 6, 1946, at 12 o'clock noon, offer for sale to the highest bidder, at public auction, for cash, on the premises, in the Town of Fountain, North Carolina, the following described property:

Beginning 100 feet from the northern corner of Square 11 on Wilson Street (and running west with Wilson Street) 25 feet, cornering thence South parallel with Jefferson Street 100 feet, cornering thence east parallel with Lang Street 25 feet, cornering thence north parallel with Jefferson Street 100 feet to Wilson Street, the beginning, being part of Lot H in Square 11 of the plot of the Town of Fountain, and being part of Lot conveyed to the Town of Fountain by Luke Lamb and T. R. Uzzell, Commissioners, by Deed recorded in Pitts County Registry in Book E-24 at page 411.

Also the building located on the above-described lot.

The building is to be sold first; then the lot as described above will be sold; then the building and lot will be sold together and the highest bidder or bidders will be declared the purchaser or purchasers of the said property.

The bid will remain open for a period of Ten (10) days for raised bids; the purchaser or purchasers to deposit 10 per cent of their bid to guarantee their good faith pending confirmation of the sale.

The Board of Commissioners of the Town of Fountain retains the right to reject all bids.

This the 1st day of April, 1946. TOWN OF FOUNTAIN, By G. E. Trevathan, Mayor. J. M. Horton, Clerk.

John B. Lewis, Atty. (A-5-4-wks.)
