WALSTONBURG NEWS

Mr. and Mrs. Carl T. Hicks spent Monday in Raleigh.

Mrs. W. R. Lang is spending a few days with friends in Wilson.

Friends will be glad to learn that Arthur Gay is improving in a Wilson hospital where he is undergoing treatment.

Mrs. G. T. Beaman visited friends in Wilson last week.

Mrs. M. Bruton Taylor spent the week end in Raleigh visiting her sister who is in a hospital there.

Rev. Key W. Taylor and Phillip Shirley spent Sunday in Raleigh.

Friends will be glad to learn that Dr. W. A. Marlowe is able to be out again after a recent illness.

Miss Rayonelle Bailey of E. C. T. C., Greenville, spent the week end here with her parents, Mr. and Mrs. G. W. Bailey.

Patrons of the Walstonburg High School welcome to the faculty, Miss Betsy Helian of Greenville, who is doing her practice teaching in the Commercial Department.

Among those attending the Crusade Assembly at the Gordon Street Christian Church, in Kinston, were Mr. and Mrs. L. M. Shelton, A. J. Craft, Mrs. Tryphena McKel, Mr. and Mrs. J. C. Gardner, D. D. Fields, Miss Lillian Corbett, Misses Margaret Fields, Rachel Griffin, Myrtle Griffin, Evelyn Mann, Grace Gardner, Christine Corbett and Alma Grey Beaman and Leonard Mann.

State College Answers Timely Farm Questions

QUESTION: What are three of the best special varieties of flue-cured tobacco for the Scotland County area of North Carolina?

ANSWER: E. G. Moss, assistant director of the Tobacco Station, Oxford, and Senior Agronomist for the U. S. Department of Agriculture, suggests 402, Yellow Special, and Virginia Bright Leaf in the order named as probably the best varieties to be planted in this area. He says 402 and Yellow Special have some resistance to nematode and a few of the best diseases. These varieties can be secured from one to a number of certified seed growers, Mr. Moss says.

QUESTION: Are wartime controls of cottonseed meal still in effect?

ANSWER: Cottonseed meal has been removed from the limitations and restrictions placed on it during the war period, and you may therefore purchase all of the meal you need for feed and fertilizer. It may be obtained from your local supplier in any quantity you may desire, according to Irvin Morgan, Jr., of the Cottonseed Crushers Association.

BIRD NOTES

At the Bird Club, Saturday morning, Marion Corbett read a description of the Kingbird whose other names are the Field Martin, Bee Martin and Tyrant Flycatcher.

Length—8 inches . . . Coloring—upper parts, black and gray; under parts, white; crown and sides of head, except cheeks, black . . . Tall-square or slightly rounded . . . The crown has a large concealed patch of orange.

The nest is frequently in an orchard and made of twigs, weed stalks, grass, roots, particles of wool and down, well combined. Lined with feathers, horse hair, fine rootlets and wool, it contains three or four white to pale pink eggs which have spots of amber and chestnut.

Kingbirds are industrious and skillful flycatchers with 85% of the food consisting of insects, which are mostly harmful. They often afford protection to nearby poultry yards and young chickens at large. Perhaps no American bird, great or small, displays more courage and persistent aggressiveness in attacking its natural enemies, especially Hawks and Crows.

This bird actually alights on the backs of the bigger birds and clings there to do all the damage it can. In this sense it is a veritable king among birds.

Glenn Bundy was the new member last week instead of Glenn Harris as was stated.

World production of beet and cane sugar for 1946-47 is estimated at thirty million short tons, raw value, by the U. S. Department of Agriculture. This is 12 percent more than the 1945-46 production.
