**PRICES DROPPED IN CLOSING DAYS OF EASTERN BELT'S 1948 MARKETING SEASON**

As the Eastern North Carolina flue-cured tobacco marketing season nears an end, sales are light in volume and the inferior offerings have reduced the weekly general average to the lowest mark of the year, report the United States and North Carolina Departments of Agriculture.

For the three days comprising the week ending the day before Thanksgiving, the general average of \$35.28 was \$4.75 below last week and \$12.05 under the season's high of \$47.33 established the seventh week of sales. The lowest daily average was also recorded during the week when Wednesday's average dropped to \$31.53 per hundred.

Most grade averages were higher than the week before with the increases ranging from 50c to \$4.00. There were a few decreases, mostly in fair and low lugs and thin, non-descript.

Sales were composed mainly of common to good leaf and smoking leaf and low to good lugs. Non-descript and damaged tobacco continued to appear in large quantities.

Gross sales were reported as 6,131,420 pounds at an average of \$35.28. For the season, sales have totaled 480,653,797 pounds and averaged \$43.10. Stabilization receipts for the week were estimated at 5 per cent and for the season at 9 per cent. The sales limitation of 5 hours a day was lifted Tuesday and Wednesday so that warehouse floors could be cleared for Thanksgiving holidays.

Three markets closed during the week, Farmville and Smithfield, on November 25 and Kinston on November 26. This leaves only four markets open for next week at which time the season is scheduled to end.

The 1948 flue-cured marketing quota has been set by the Secretary of Agriculture at 955 million pounds. This will result in an average reduction of about 28 per cent. Converting the quota poundage figures to acres, on the basis of the 1942-47 yields, the 1948 acreage allotments would total about 909,000 acres as against 1,257,000 acres allotted in 1946 and 1,247,000 acres allotted in 1947.

**BIRD CLUB**

"Brown Pelicans Nesting in Pamlico Sound" by Bob Wolff of Goldsboro was subject of study at the Bird Club Saturday morning and was read by Tommie Bennett. It stated Bob Wolff and three companions spent two days in the vicinity of Ocracoke in August and found 14 active pelican nests and several inactive ones. These nests are heavy, rough affairs, composed of drift branches, and are about 26 inches across. They counted 32 immature and 55 mature pelicans. The immature birds ranged from the size of a pigeon to three fourths grown. The large young were covered with a white down. They set up a terrific din, squawking and snapping their long bills. He said it was a marvelous sight to see the mature birds wheeling over their heads as they examined the nests and young.

The boys assisted in making marshmallow squares which were greatly enjoyed.

A story, "Little Brown Koko's New Skates," was read.

**NOTICE!**

Our pecan buyer will not be in Farmville on December 10 as formerly advertised
