SUNDAY SCHOOL PICNIC

Mr. A. W. Gillette, Superintendent of the young ladies' Sunday School Class of St. Paul's church entertained the class at an old fashioned barbecue last evening at the City water works plant west of the city and those attending report a very enjoyable time. Mr. Gillette has on several previous occasions entertained his class a barbecue, and in this way bringing them together on a social plane as well as on a spiritual plane. He is able to maintain a remarkably high standard of order and discipline in his class of young ladies for a city the size of Goldsboro. There were approximately one hundred in attendance at the festival last night.

The following were present:
 Mesdames Graves Smith, Will Ormond, Harvey Jones, Fayette Sasser, Henderson, Norman, Styron, Wm. Tofer, Frank Pratt, John Hooks, Jr., Dewey Simmons, Henry Kennedy, Dewey Simmons, Henry Kennedy, Floyd Uzzell, Carl Baldwin, C. D. Groves, J. C. Harrell, Dewey Hunt, J. S. Britt, Misses Mabel Langston, Anna Anderson, Alna Bizzell, Margaret Sasser, Nellie Crow, Ruby Crow, Lois Lynch, Catherine Grantham, Grace Grantham, Winnie Cash, Della Brown, Anna Stevens, Margaret Williamson, Mary Alice Groves, Fannie Brogden, Marguerite Bell, Mamie Ruth Bell, Beulah Westmoreland, Martha Westmoreland, Katherine Farris, Daisy Jenkins, Beatie Powell, Tossie Montague, Dixie Montague, Minnie Boyette, Lola Hollingsworth, Mary Rachel Moye, Elsie Lee Korogay, Blanch Sammeth.
 Messrs. Bob Edwards, A. T. Griffin, Tom Robinson, Graves Smith.

very bright. He expected to go to Charlotte within the next few days to complete arrangements with the State Agency for the 1924 season. He is very enthusiastic about the new models of the Buick, and justly so, for without a doubt is in the most beautiful automobile the Buick people has ever built.

Mrs. Frank Simmons and Miss Ella Casey have just returned from a delightful vacation at Wrightsville Beach. Miss Casey said they had a most enjoyable time while there.

Mrs. Chas. Shoumb of this city has returned from a very pleasant vacation in the western part of the state. She spent some time at the Robert E. Lee Hall, Blue Ridge, N. C.

Fifteen cents a day is considered big pay for common labor in India. About 250,000,000 tons of coal were mined in Great Britain last year.

Baltimore now has a steamship a day to the Pacific coast and five steamships a day to Europe.

The mines of Saskatchewan established a new low record last year with only one fatal accident.

Hay is now being made in many parts of England by means of an electric fan which dries the grass, which is cut and stacked while still green.

Before the great war Great Britain

owned nearly 45 per cent of the world's total tonnage of iron and steel steamers; now it has decreased to less than 33 per cent.

HIS CANNON IS TESTED

The first promising automatic cannon to be brought by the United States ordnance department to a point where it can be tested is known as the Jervey gun, from the name of its inventor, Capt. Thomas H. Jervey, ordnance department, U. S. A. It is of 37 mm. caliber and is fully automatic and can be used in the air, on the ground, against aircraft and against tanks. The Jervey gun shoots one and one-tenth pound shells of either high explosive or armor-piercing type in bursts of five.

In Furnishing City Apartment Art and Ingenuity Are Needed

By an Interior Decorator

Many dwellers in small apartments probably consider the problem of arranging their furnishings in the restricted space allotted them more an object of ingenuity than one of interior decoration.

The art which has done so much

a result of ingeniously exercised artistry.

The console table under the mirror is of a size to fit against one end of the center table. Elsewhere in the room is a similar console. The three, in conjunction, make a commodious dining table.

In modern times to renege the average dwelling house from the curse of uselessness has not neglected the apartment.

The illustration indicates the method by which a decorator may double the capacity of a room and at the same time insure its beauty. The capacity is doubled by choosing and arranging the furnishings so the room may be used both for a living room and for a dining room. The chairs are straight-backed and appropriate for use in either sort of room. The table is

This example of generalship is further accentuated by the plain walls and floor which give an effect of spaciousness. The mirror, a tasteful picture, the folds of the daisiac overhanging and the metal fluted net or lace window curtain which admit a maximum of light while insuring privacy.

Eliot, Harvard President Emeritus, Advocates Incorporation of Unions; Says Labor Responsibility Necessary

DR. CHARLES W. ELIOT

Dr. Charles W. Eliot, president emeritus of Harvard, recently told the National Coal Association that monopoly of any kind in connection with such a basic commodity would not be tolerated. As the bituminous coal industry, which the association represents, is composed of 9,000 independent operators and has been noted for the keenness of its competition, it was assumed that Dr. Eliot referred to the growing power over the whole industry of the United Mine Workers of America, whose monopolistic ambitions and accomplishments have been stressed repeatedly in charges before the United States Coal Commission.

President Eliot informed the Coal Association that "the American people have already shown by their votes, their voluntary actions in

emergencies, and through the press, that hereafter they will not have the supply of coal to the factories, households and carriers of the country abridged, much less stopped, by any monopolistic control whatever."

Dr. Eliot also advocated the incorporation of all unions, which relate to the coal industry and the industries that distribute coal, and the submission to arbitration of disputes arising in the industry.

In speaking of the unions he said: "In the public interest it is inexpedient that these secret societies, which collect large sums of money from their members, and use all their resources to support strikes, however violent, should continue to be exempt from the usual legal processes to prevent violations of contract and enforce payment of damages."

FOR CONSTIPATION

Black-Draught Recommended by an Arkansas Farmer Who Has Used It, When Needed, for 25 Years.

Hatfield, Ark.—Mr. G. W. Parsons, a well-known farmer on Route 1, this place, says: "I keep Black-Draught in my home all the time. It is the best all-around medicine I have ever found for the liver and for constipation. We began using it 25 or more years ago and have used it whenever needed since. I have never found any other medicine as good for constipation, and that was what I suffered with till I began using Black-Draught. Black-Draught corrected this condition, and now we use it for the liver and for indigestion—a tight and sluggish feeling after meals, for bad taste in the mouth and sour stomach.

"My wife uses it for headache and biliousness. It acts on our shell and we don't let it get out. It has been a great help to us. I believe a great deal of sickness is caused by hurried eating and constipation, and Black-Draught, if taken right, will correct this condition."

Get Theford's, the original and only genuine Black-Draught powdered liver medicine. Sold everywhere. NC-150

AS JUVENILE DAIRY CLUBS SPREAD

A dollar represents the value of the cows being cared for by the girls in the United States. An army of 18,408 girls are engaged in this service of agriculture.

Starting in the rich dairy states of Wisconsin, New York, Pennsylvania and Ohio, the juvenile dairy clubs have swept the entire country. They are dairy clubs which are heifer clubs. They will watch the young heifers until they are ready to calve. They will compete in the dairy club contests which will prove a profitable and interesting experience to the girls.

Old Bessy is going to pay the college expenses of many American girls during the next few years, said a leader of the juvenile club's movement.
