Stars Keep Troops' Spirits High

Over 75 star personalities of the entertainment field helped to make March of Time's "Show-Business At War" film which shows what the amusement industry is doing to keep our boys happy. Top, Al Jolson sings his famous "Mammy" for soldiers in a far outpost. Centre, at a Command Performance for troops, Carole Landis—to the delight of announcer Don Wilson—breathes a sigh over the microphone for enraptured admirers somewhere in the Pacific; and below, Irving Berlin revives his World War I hit: "Oh How I Hate To Get Up In The Morning."

Woman-POWER!

She's 5 feet 1 from her 4A slippers to her spun-gold hair. She loves flower-hats, veils, smooth orchestras—and being kissed by a boy who's now in North Africa.

But, man, oh man, how she can handle her huge and heavy press!

Wait a minute. . . . How can 110 pounds of beauty boss 147,000 pounds of steel? . . . Is this magic?

Yes, in a way. The modern magic of electric power. The magic that makes it possible for a girl's slim fingers to lift mountains of metal, or set great wheels in motion—just by pressing a button or pulling a lever.

Women are able to work beside men on

America's roaring production lines because electricity does the heavy labor. America's war production is the greatest in the world largely because America has the world's greatest supply of electric power. And America's electric companies under business management provide over 80 per cent of all that power at low pre-war prices!

Call that magic, too! But the experienced men and women of the electric companies take it in stride. All in the day's work! All part of knowing the job. Their proved skills were ready when the war came, so that

now we Americans are producing far more power than all the Axis countries combined!

Politically enslaved, the despairing workers of Germany, Italy and Japan can't begin to compete with free people.

But electricity has helped inventive, independent Americans to step up the nation's manpower—and woman-power—tremendously!
