

PENDER

- HONEYDEWS, Vine Ripened, Each 37c
- POTATOES, Sweet, 4 Pounds 30c
- GRAPES, Red, Ribier or White, Pound 24c
- LEMONS, 432s, Dozen 26c
- TOMATOES, 3 Pounds 28c
- SQUASH, Yellow, 2 Pounds 27c
- BEANS, String, 2 Pounds 29c

Fresh Roasted! Fresh Ground!
DOUBLE-FRESH COFFEE!
D. P. Blend Rich, Full-Bodied - 1-lb Pkg **24c**
Golden Blend Mild and Mellow 1-lb Pkg **21c**

- (11) String Beans Standard 19-oz Can **12c**
- (1) Milk Colonial Evaporated Tall Can **9c**
- (18) Tomatoes Standard 19-oz Can **11c**
- (2) V-8 Cocktail 18-oz Can **14c**

SAFE HOME **Matches** Box **5c**
 LANG'S SWEET **Relish** Quart Jar **22c**
 OLD DUTCH **Cleanser** 2 Cans **15c**

FREE RUNNING **Sterling Salt** 2-lb Pkg **6c**
 MOTHER'S SALAD **Dressing** 8-oz Jar **12c**
 RED MILL **BUTTER** 16-oz Jar **30c**
 WHITE HOUSE **Vinegar** Quart Bottle **13c**

PENDER'S BEST **FLOUR** Plain 10-lb Bag **59c**
 HIGH MARK **Pancake** Flour 20-oz Pkg **7c**

Prevent Storage Rots Of "Yams"

Proper culling of sweet potatoes in the field and the maintenance of the right curing and storage temperatures can go a long way in reducing losses caused by the various rots which attack the crop in storage, says H. R. Garriss, Extension plant pathologist at N. C. State College.

Crates and storage houses both need to be thoroughly disinfected before the crop is stored. The usual method is to spray the crates and the interior of the house with a solution of one pound of copper sulphate to ten gallons of water, and allow to dry thoroughly before storage of the crop.

In fumigating the house, 3 pints of commercial formaldehyde and 23 ounces of potassium permanganate are used for each 1,000 cubic feet of space. Since these materials are difficult to obtain, it may be necessary to use one pound of flowers of sulphur per 1,000 cubic feet of space in disinfecting.

Garriss urges growers never to put any potatoes in a storage house which show disease symptoms. Diseased potatoes only serve to spread the rot to healthy potatoes in storage.

Curing potatoes at 80 to 85 degrees Fahrenheit for two weeks permits the rapid healing of wounds and prevents infection from rot fungi. After curing the temperature should remain around 50 degrees, never below 40.

Permanent Pastures Should be Sown Now

Mixed pastures, which will provide grazing from about May 1 until frost, should be planted during September and the first half of October on fertile lands in a high state of cultivation, E. C. Blair, Extension agronomist at N. C. State College, advises.

These pastures will give good grazing on soils of medium fertility, if they are fertilized annually and not over-grazed during hot, dry weather.

They respond to good seed bed preparation. Blair points out that the ideal seed bed for pastures is one that is thoroughly pulverized to a depth of three inches, and left undisturbed below that depth. For this reason, plowing should be avoided unless it is done at least six to eight weeks before the sowing of the seed.

Lands that have been in row crops can be prepared by discing and harrowing, but land that has been idle may have to be plowed shallow before discing.

Pasture seeds are usually sown by hand and covered very lightly with a weeder or a brush. It is better, however, to put them in with a grain drill, running about one-half inch deep. This method requires less seed for the same results than with hand sowing. It is good practice to roll the soil after the seed are covered.

Frills To Go

Washington, Aug. 21—The frills have got to come off mittens and mufflers, swimming suits and sweaters.

To conserve materials, the War Production Board has ordered all knitted outer garments standardized for the duration. The order:

Bans double-breasted sweaters, eliminates embroidery, spangles, appliques, and "exaggerated" sleeves, provides for "plain, unadorned" knitted gloves and mittens, forbids side, strips and belt loops on swimming trunks, and limits the length of knit muffler to 52 inches.

"The main purpose," said WPB, "is to provide utilitarian and durable knit outerwear which is not likely to be outmoded by style changes and fads." Women's sweaters are restricted to seven basic models with six color arrangements for a season.

The World's News Seen Through THE CHRISTIAN SCIENCE MONITOR

An International Daily Newspaper

is Truthful—Constructive—Unbiased—Free from Sensationalism—Editorials are Timely and Instructive and its Daily Features, Together with the Weekly Magazine Section, Make the Monitor an Ideal Newspaper for the Home.
