

This is **OK**

When you want to read the paper don't hesitate to use all the light you need. There is plenty of electricity for all needs, and lighting is essential for reading and eyesight conservation.

This is waste

When you have finished reading, or leave a room, don't permit electricity to "loaf." Turn off lights when they are no longer needed.

**Anti-Freeze Used
Second Year Must
Be Acid-Free**

Wilmington, Oct. 20.—Motorists who will use again this winter the anti-freeze solution of last winter were told today by G. T. Musselman, ODT district motor transport manager, how to offset the loss of strength and to counteract acid or rust producing elements.

Permanent type anti-freeze can be treated with an inhibitor and reused, he said. Under the necessity of war conservation permanent type anti-freeze (ethylene glycol type) were used by many car owners for a second season during the 1942-43 winter. The same necessity for reuse will occur during the coming winter. The reuse of the anti-freeze last winter was the first time that this practice has been done extensively by the car owner. This second use developed some minor cooling system troubles which are easily correctable so that the anti-freeze can be safely reused as long as it has desirable anti-freeze qualities.

The permanent type anti-freeze which have been on the market have contained a rust preventive which was expendable. In addition, it has been found that these permanent type anti-freezes may become slightly acid with continued use and under these circumstances may have corrosive action on certain parts of the cooling system.

An acid condition can be determined by testing the solution with blue litmus paper. If the solution turns the blue litmus paper distinctly pink or red, it is an indication that the solution has become acid.

Acid and rust inhibitors can be safely added to the solution to restore the original non-corrosive and rust inhibiting properties. These inhibitors do not increase the anti-freeze strength but only counteract any possible acid development and renew the rust inhibiting properties.

After terrific struggle, the freshman finally finished his examination paper, and then at the end wrote: "Dear Professor: If you sell any of my answers to the funny paper I expect you to split fifty-fifty with me." —Anon.

ROUGH AND READY—Airborne Engineers must know how to do everything—dig ditches, build and repair airfields, construct buildings—in addition to fighting. Above are some of the boys deepening a culvert ditch at Laurinburg-Maxton Army Air Base, an installation of First Troop Carrier Command. The Engineers pride themselves on being rough and tough, ready for any emergency. (U. S. Army Photo).

**Civilian Concerns
May Sell Army
Insignia 'Til Jan. 1.**

Atlanta, Ga., Oct. 20.—Information has been received from War Department by Headquarters Fourth Service Command that the sale of Army insignia by civilian firms will be permitted for an additional period ending January 1, 1944. This extends the dead line previously set for October 18, 1943.

All holders of War Department certificates (095) will be authorized to sell metal, cloth and plastic insignia for the extended period of time. Firms holding War Department certificates are being so notified by individual letters. Firms not holding this War Department certificate will be permitted to sell only cloth insignia, such as chevrons and shoulder patches for this additional period of time.

**Negro And Indian
Schools Will Open
Monday, Oct. 25th**

The Negro and Indian schools of the county will open for the 1943-44 session on next Monday, October 25th. All vacancies have been filled and the schools are expected to open with a full corps of teachers.

The pre-school negro teachers meeting will be held at the Upchurch school auditorium on Friday evening October 22 at 8:00 o'clock. Patrons of the schools, wishing too, are invited to attend.

The Indian teachers will hold their conference in the office of the Superintendent on Saturday, October 23. Blair E. Bessley, representative of the State Highway Safety Division will be here today to examine negro bus drivers. The buses will be delivered to the drivers on Saturday, October 23rd after inspection by representative of the grand jury.

Four young men visiting the Orient before the war, who considered themselves very clever, had a Chinese servant upon whom they played all sorts of pranks.

One night they nailed his shoes to the floor. The next morning, without a word or sign of retaliation, he brought in their coffee.

Next day they put sand in his bed. The next morning he served their coffee smiling blandly, with no trace of resentment in his attitude.

So they decided to play no more tricks on such a good fellow, and told him so.

"No more nailed shoes to floor?"
"No."
"No more puttee sand in bed?"
"Velly well, no more puttee mud in coffee." —Anon.

**Air Base Soldier Is
Father Of Twins**

Laurinburg-Maxton Army Air Base, Oct. 15.—Thomas A. McNeill, machinist, employed at the 399th Sub-Depot, a unit of the Air Service Command, became the father of twins recently, a boy and a girl, the first twins to be born on this field. Babies and mother are doing fine at the McNeill apartment in the Civilian Housing Project where the twins were born.

McNeill is a native of Blue Springs (Hoke County), N. C., and is the son of Neil A. and Mrs. McNeill of that place, and has been employed at the 399th Sub-Depot since December 16, 1942. He was in Government service for some time prior to his transfer to this base when the 399th Sub-Depot was activated.

**Leak Springs' Church
Sings Spirituals In
All-Day Service**

The congregation of Leak Springs church, a church for the colored people invited many white people to their all day service which was held Sunday. They had preaching in the morning, served a barbeque dinner at midday and then sang Spirituals in the afternoon. Those who attended were enthusiastic in their praise of the services.
