

Increased Demand Placed On Service Industries by War

How war's impact has added to the responsibilities of America's utility, railroad and telephone industries is shown graphically in the above chart.

The magnitude of the added volume of work placed upon the men and women of these great service industries is difficult for the layman to grasp. The chart is worthy of study.

In every instance these industries have met war's challenge while maintaining practically normal standards of service to the civilian population. The workers who have quietly carried on these

enormous tasks are not eligible to receive official government awards for their truly great wartime accomplishments.

In an effort to give credit where credit is so obviously due, General Cable Corporation - the nation's leading independent supplier of electrical wires and cables, - has undertaken to publicize their records of accomplishment. An editorial from the New York Times calling attention to the patriotic contribution of these war workers, has been reproduced in a General Cable advertising release from Coast to Coast.

State College Hints To Farm Farm Homemakers

By Ruth Current, N. C. State College.

If not for this year, then for next, line a stone crock with grape leaves, fill it up with little green tomatoes and dill. Use the same strength brine as you would for cucumbers. The finished product resembles small green olives.

Use a transparent ruler for marking hems or measuring button holes, it will make the sewing job much easier.

If your scissors develop a catch when you're cutting, borrow an old-time trick from the tailors, open them wide and draw them over your hair in the back, turn them over and do the same with the other side. This oils the blades just the least bit, enough to make them work smoothly.

Store all table fats in covered dishes in the refrigerator. Place them on the shelf next to the freezer compartment. Keep them away from foods with strong flavors and odors.

Return them to the refrigerator immediately after using, and do not leave cooking fats standing on the stove.

Save pork, beef, and ham fats for cooking eggs, seasoning vegetables, and for baking beans and peas. Store them, covered in the refrigerator.

To save chicken fat, strain it and

State College Answers Timely Farm Questions

Q. Bone meal is hard to find so I would like to know if there is anything I can use in my feed mixtures to take its place?

A. Defflorinated rock phosphate may be fed as a substitute for bone meal, according to Dr. A. O. Shaw. This material should not be used in excess of 2 per cent by weight of the total grain fed. In other words, do not use more than 2 pounds of defflorinated rock phosphate with every 100 pounds of grain fed. This material is cheaper than bone meal, and should be available from feed manufacturers.

Q. How long can I wait after my lespedeza seed have matured or frost has killed the plant before harvesting the seed crop?

A. Seed of the Common lespedeza

pour it into a bowl, and allow to congeal. Remove the congealed portion and store, covered, in the refrigerator.

and Tennessee 76 varieties will shatter very soon after they ripen, around the first of November. These varieties should be harvested just as soon as possible after ripening or killing frost. Seed of the Korean lespedeza do not loosen enough to permit the use of a seed pan until three to four weeks following ripening.

Q. At what temperature should I keep my sweet potatoes during curing?

A. The sweet potato curing house should be kept at around 75 to 80 degrees during the curing period. If temperatures are allowed to run too high the potatoes in the top tier of baskets will cure out much faster than those in the lower baskets and an uneven cure will result. As soon as the potatoes in the top baskets begin to show evidence of sprouting the heat should be lowered. The best temperature for storing is around 55 degrees. If the storage temperature goes much below this there is danger of cold damage.

Pigs

Farmers can save themselves a lot of headaches by taking definite steps immediately to market the record 1943 pig crop in an orderly manner, says Food Administrator Jones.

Fruit Spreads

Consumers will use their processed food stamps to buy fruit spreads. These include the green stamps in Book Four.

Turkey
The entire turkey needs of the armed forces, totaling approximately 35 million pounds, represent less than 10 per cent of the total U. S. supply, says the War Food Administration.

Food Needs
Under the present set up, our armed forces get 13 per cent of 1943's food; civilians, 75 per cent; Lend-Lease, 10 per cent; and friendly neighbors, two per cent.

Fertilizer
WFA points out that farmers can save money and at the same time make a substantial contribution to the war effort by buying higher analysis fertilizers.

From where I sit
by Joe Marsh

Charlie Jenkins writes me from down at camp:
"Dear Joe: Somethin' mighty swell happened to me on my last day's leave. I'm standin' on the corner, not knowin' anybody in town, when a stranger says 'hello, soldier-how'd you like a chicken dinner at home with me and the wife?'
"Well, it turns out they were the kind of folks who couldn't do enough to help out soldiers. They'd invited two other fellows a id just as soon as we're introduced the lady brings us a glass of beer before dinner.
"We had a fine dinner, talked till ten... Honest, Joe, I'll never forget their hospitality. Makes me feel good fighting for people like that."
"Thought you might like to hear what kind o' fellows we got in this army of ours, and how they like to enjoy themselves when they get a chance to."
Joe Marsh

IT'S NO PIPE DREAM, BUDDY

No doubt about it, it's tough when you have to stand up to ride. But don't think you're gettin' a true picture of bus travel now. I've been drivin' many years and know how folks really enjoy a bus ride under normal conditions.

And after we give the ax to the Axis, I'll show you real travel pleasure, with finer equipment, more comfort and service than ever before.

That's no pipe dream, and here's hopin' that happy day will come—soon.

Bill—the bus driver

SPECIAL ATTENTION MR. FARMER! FERTILIZERS

We will be in a position to start delivering your fertilizer requirements for the 1943-44 Season, beginning OCTOBER 15th to NOVEMBER 1st, 1943.

To insure your having your fertilizers when you need them it is necessary that you start taking in your fertilizers not later than OCT. 15th to NOV. 1st. This is due to the fact that the LABOR SITUATION is even now EXTREMELY CRITICAL and daily becoming more CRITICAL. Also, deliveries will have to be made with inadequate transportation facilities.

It is true that for the duration, you as well as ourselves are compelled to operate our business under the most unusual conditions, which will work a hardship on all of us. In your case it means that you will have to take in your fertilizers well in advance of the time that you will actually need them, to insure your having them on hand when you will need them. To whip the Axis and bring the War to a quick ending it is necessary that we all work together, and give and take when and where it is necessary.

TO YOU WHO ANTICIPATE FARMING DURING 1944: For reasons other than those outlined here, a bird in hand during October, November and December will be worth much more to you than what birds you may have in hand after that time.

Your small grain sowed this fall should have ample fertilizer under it, in addition to being dressed with Nitrogen next Spring. We can furnish your requirements for this also.

Make your plans now—See us or our Agents, and let us start delivering your fertilizers not later than October 15th to November 1st.

Buy DIXIE BRAND FERTILIZERS and grow PROFITABLE CROPS.
