### CAREER STORY

GREGORY PECK, new menace to feminine hearts due soon to be uncovered by Producer Casey Robinson in RKO Radio's "Days of Glory," was born next door to Hollywood, but was discovered by the movies only after he went to New York and made a sensational rise on the stage. Born at La Jolla, Calif., he spent his boyhood outdoors. He entered the University of California intending to become a physician. There he became a crewman, rowing for California at Poughkeepsie in 1928, and out of athletics received a spinal injury which today keeps him out of armed services. He dropped his M.D. ambitions after playing in a college production of "Anna Christie." He hid East in 1939 and in New York became a barker on the World's Fair Midway. Later he worked as a guide at Radio City. Meanwhile he won a two-year scholarship in the Neighborhood Playhouse School of dramatics. Summer theatre work followed, with Karen Morley and with Ruth Chatterton. Finally he went on tour with Katharine Cornell in "The Doctor's Dilemma," then won male leads on Broadway. Seen by Casey Robinson in "The Morning Star," he was booked for the movies.

## Rea Seeks Wise Electricity Users

Cpl. and Mrs. Woodrow W. Brady of Camp Mackall and Sgt. and Mrs. P. W. Scott, also of Mackall, have rooms here with Mrs. C. W. Seate.

Lt. and Mrs. E. F. Thomas, who have been staying at the Seate home, now have an apartment in the home of Mrs. Ina T. Lintz.

The Federal Rural Electrification Administration is making plans to provide a plaque to be awarded to one farmer in each county who, through the use of electricity, has increased the quantity and quality of his food and feed, announces D. S. Weaver, engineer State College.

Beginning immediately farmers who know of people who have used electricity to help meet their food goals in war times are asked to report

their names to the county farm agents.

Both cooperative customers and public utility users are eligible, Weaver says. He hopes that every county in North Carolina will have at least one award winner in this campaign.

By the terms of the announcement, although provision has been made for plaques for every county in the United States, it is expected that some areas will have more than one winner and some counties will have none.

Bases on which the awards are to be made are these: increases in production; maintenance of production with less labor; use of time saved by farm women through electrical appliances in dairy and poultry production, gardens, canning or field work; and self-sufficiency on the farm through the production of food and feed products.

Complete details of the contest may be obtained from the managers of the 28 cooperative REA organizations in North Carolina.

Weaver urges farmers to begin now looking through their neighborhoods for persons to be nominated to their county agents.

### CONVERTED FARM TRACTOR FIRST VEHICLE TO BE CALLED "JEEP"

MINNEAPOLIS, MINN.—The name "Jeep" was first given to a converted MM farm tractor, shown above, and used during maneuvers at Camp Ripley in 1940. This military tractor was termed "Jeep" by James T. O'Brien, then a private in the 109th Ordnance Company, Minnesota National Guards, who now is a First Sergeant in the United States Army. Sergeant O'Brien says he called it "Jeep" because it could go almost anywhere and knew all the answers just like the "Jeep" in the Popeye cartoons, who also knew all the answers and if treated right could do many unusual things. This dispels the popular misconception that the nickname came from the contraction of the words "General Purpose" (GP), an Army and agricultural tractor term. "Jeep" became Army parlance and it is acknowledged that if it were from "General Purpose" the spelling would be "Geep." The original Minneapolis-Moline Jeep was a four wheel drive machine made expressly for pulling big guns and heavy equipment now used on many battle fronts.
