## Fifth Christmas Tour Set For Fayetteville

The fifth annual Christmas Candlelight Tour will be held on December 5, 1982, (Sunday, 2:00 - 6:00 p.m.), and December 6 (Monday, 6:00 - 9:00 p.m.) in the Historic District of downtown Fayetteville.

Sponsored this year by the Garden Club Council of Fayetteville; Historic Fayetteville Founda-

tion, Inc.; Historic and Scenic Sites Committee, and the Woman's Club of Fayetteville, nine buildings and six downtown churches will be opened and decorated with candles and live Christmas greenery.

A special attraction will be the display of the new "Cross Creek" fabric and wallpaper at the Beldon-Horne House, 519 Ramsey Street.

## Craft Fair Successful

The first annual Arts and Craft Fair was held Monday, November 22 in the Media Center at Pinecrest High School.

Students, faculty, and staff were given an opportunity to see arts and crafts provided by the Pinecrest community as well as displays from some of the members of the Pinecrest Friends of the Library.

Also five ladies from Hoke County were on hand to display their crafts. Betty Barnhart, and Anna Lee Maxwell from Raeford each displayed their quilts, pillows, placemats, skirts, and pocket-books.

Wanda McPhaul, Harriet Archer, and Faye Davis, Home Economics faculty members from

Hoke County High School had a display depicting student work in the areas of sewing and cooking.

Media Specialist Elizabeth Burgess stated that the fair was a huge success.

The Pinecrest faculty and staff supported the event in great number.

Entertainment was provided by the Swing choir directed by Jeff Whicker and Pat Yates. Also the Male chorus, Ensemble, and Mixed Chorus performed in the Media Center directed by Jeff Whicker.

Teena Little, president of the Pinecrest Friends of the Library, provided volunteers to help in the media center.

### Schedule

Thursday, November 25, 1982, 5:00 p.m. - North Raeford Extension Homemakers Club Meeting.

### Hint

Wet the knife between cuts to slice hard-cooked eggs without crumbling.

### KEEP COSMETICS CLEAN

Careful handling of any cosmetic is important. But it's also important to keep containers of eye makeup closed and free from dust and contamination. Here's another reminder. Before applying any makeup, be sure both your face and hands are clean. Be especially careful to wash hands before dipping them into jars of eye cream and eye shadow.

Many cases of eye infection have been caused by bacteria transmitted by and from the jar to the eye. Also keep eye grooming aids, brushes and applicators clean. And never loan your personal cosmetics to another person. If you haven't used a particular eye makeup for several months, discard it. Then buy a new supply that doesn't run the danger of being contaminated. The preservatives used in cosmetics lose effectiveness as time goes by.

### SMALL APPLIANCES SAVE ENERGY

If you already own a small cooking appliance, such as an electric skillet, you could cut down on the amount of energy used to prepare food. Here's what I mean. Let's take the electric skillet as an example. It's more than just a fry pan.

You can use it to roast, pan-

broil, bake or simmer. You could prepare baked potatoes, a pot roast or a cake in the skillet -- without using the extra energy that would be needed to heat up a conventional oven. Be creative with those "special-use" small appliances, too.

That pizza maker may work perfectly for heating frozen convenience foods. The wok (walk) can be used as a steamer or soup kettle.

Or, you can make waffle brownies in the waffle iron. So, use your creativity and your small appliances to save energy when cooking foods. And be sure to check the use and care booklet for suggestions and cautions. Keep in mind that if you already have a small appliance, you can save energy by using it to the fullest.

### TIGHTEN UP MOBILE HOMES FOR WINTER

Though winter may seem a long way off, now is the time to start thinking about getting your home ready for the weather change. If your home is the "mobile" type, you're even more limited in the energy improvements you can make. But there are still a few things you can do. The most important is to have a skirt put around the mobile home -- if it doesn't already have one. This will help keep out the cold.

Even if there is a skirt and your floors have still been cold, then you may want to add some insulation underneath the mobile home. One possibility is to install batts of fiberglass insulation held in place with chicken wire.
