**How to control athlete's foot**  
Since jogging, basketball, tennis and other kinds of active sports have become such an important way of life, it's important to know something about how to treat and prevent fungal infections of the foot.  
The fungi that causes athlete's foot and jock itch thrive in moist, dark environments such as locker room floors and wet, dirty socks and sweaty shoes.  
As your pharmacist, I often recommend an over-the-counter treatment such as Tinactin. As for prevention, see me. Let's discuss the situation. Any number of adjustments can help eliminate fungal recurrence.
