## Raeford native named UNC assistant coach

Mike Peckham, a native of Raeford, who has worked with the North Carolina women's basketball program for the past four years, has been named the school's first full-time assistant in that sport.

The announcement was made this week by Athletic Director John Swofford.

"Mike has done an outstanding job for us in a part-time role for the past four years," said Swofford. "He has had a big part in the team's recent success and will certainly be part of that in the future."

"We are very excited that Mike has been promoted to a full-time position," said Head Coach Jennifer Alley. "The program's success is due in a great part to his hard work and the advances he has made in the recruiting field. He has certainly been a dedicated and loyal worker on a part-time basis."

"This appointment, along with the move into the new Student Activities Center for the 1985-86 season, are indicators of the commitment North Carolina's athletic program has made to the future growth and success of its women's basketball program," said Alley.

Peckham joined the program in 1981 as the junior varsity assistant coach. He served as a graduate assistant for the varsity squad the following year and became part-

Mike Peckham

time assistant for the 1982-83 season.

Peckham will continue to concentrate his efforts on recruiting as well as assist in scouting and general administrative details. His recruiting efforts have helped the Tar Heels to back-to-back 20-win seasons. Carolina won its first ACC Championship in women's basketball last season en route to a school record 24-8 record and 14th-place national ranking.

Peckham is a 1977 graduate of Hoke County High School. He received his bachelor's degree in recreational administration from Carolina in 1982.

## Duke expedites healing for injured athletes

By Catherine Macek  
Duke University Medical Center  
Whether you're an Olympic hopeful or a weekend athlete, injury often accompanies physical activity. Fortunately, most injuries are minor ones -- scraped knees or sore muscles -- that can be treated with a bandage or aspirin.

But recovery from severe injuries, especially ones requiring surgery, often is a long, tedious

process. DUSMOR -- Duke University Sports Medicine and Orthopaedic Rehabilitation -- is a program designed to expedite the athlete's return to the gridiron or jogging trail.

"It is often difficult to determine exactly when an athlete has recovered from an injury," said Dr. William E. Garrett, assistant professor of orthopaedic surgery and director of DUSMOR.
