Old Faithful is getting tired. Yellowstone's famous geyser, which has spouted every 69 minutes for almost a century, now makes visitors wait as long as 100 minutes between eruptions.

An earthquake is partly to blame, say scientists, but so are tourists who persist in dropping objects into the geyser, thus reducing its water supply.

# ORDINARY INTEREST-CHECKING VS. CS&L III.

Both CS&L III and the typical interest-checking or NOW account will pay interest on your idle checking funds. And both will let you write all the checks you need.

But instead of paying a flat 5 1/4%, CS&L III pays money-market rates, compounded daily.

And the difference at the end of the month can be an awful lot of bread. To see the difference it could make for you, visit any Southern National Bank office.
