

How To Get Nearly 1000 lbs. of Lime For Nothing

PROFESSOR MASSEY, on the editorial page of The Progressive Farmer for September 17th, says:

"If you want a fertilizer carrying lime, buy the basic slag or Thomas Phosphate, and you will get 40 per cent of lime without paying for it, as the price of the phosphate is determined by the percentage of phosphoric acid it contains."

Every ton of Thomas Phosphate contains nearly 1000 pounds of lime.

Thomas Phosphate has no "filler."

Every pound in a ton has its value.

Send for free pamphlets "Thomas Phosphate and Its Uses" and "Home Mixing."

PIEDMONT BUGGIES

Built in the South by Southern
Men for the Southern Farmers

Piedmont Buggies are being made in a modern plant where every device for a well-constructed buggy is used. Every piece of material is personally inspected, and every employee is an expert in his particular line.

When you buy a *PIEDMONT* you help a Southern manufacturer and help to upbuild the South.

Ask your local dealer to show you a *Piedmont* when you want to buy a good BUGGY. If he has none write for a *PIEDMONT* catalogue.
