

Who's to Blame.

Proclaiming that God is all love, we blame Him with many things that if true would indicate that He is anything but love. For instance, we allow unsanitary conditions at our homes and the typhoid fly gets in his deadly work. Then the preacher says something about the mysterious workings of the Almighty and the papers publish "resolutions of respect" in which it is said, "Whereas God in His wisdom has seen fit to remove from our midst," etc. Beyond the working of His natural laws God had nothing to do with the tragedy. It is ourselves who are to blame, and it is up to us to do what we can to prevent disease. Now is the season for a general cleaning up. Mosquito-breeding water, fly-breeding filth and all sorts of trash should be done away with and disinfectants such as lime, it being more easily secured and handled, should be scattered liberally.—Catawba (N. C.) News.

"WOOD'S CROP SPECIAL" for September, says—"It is always advisable, in our opinion, for farmers to put in as much of their land as they can in the fall. We nearly always get seasonable growing weather during the fall and the early spring, and crops sown in the fall not only furnish a cover crop for the soil, but are growing and thriving at seasons which in recent years have proved most advantageous in our southern soils and climate. We would therefore urge our farmers to sow all the land possible in suitable crops this fall, so as to provide against the repetition of short feed crops another year."

"Wood's Crop Special" is issued monthly and gives timely and reasonable information about seeds that can be planted to advantage and profit each month throughout the year.
